

FIRST ANNOUNCEMENT

Nowadays, industrial fibres of natural (various types of asbestos) and synthetic origin (glass fibre, basalt fibre, ceramic fibre, etc.) are used practically everywhere.

It is difficult to mention other hygienic factor, which can attract such great attention of specialists in occupational medicine, related branches of science, mass media, many respective organizations (World Health Organization, International Labour Organization, International Insurance Association, International Program on Chemicals Safety).

In the process of discussing the problem of chrysotile asbestos reference to Annex 3, taking place at the 5th Conference of Parties of the Rotterdam Convention concerning the procedure of the prior informed consent on selected dangerous chemicals and pesticides in the international trade (June 19-25, 2011, Geneva, Switzerland) one of delegations proposed to conduct a scientific conference in order to make a grounded decision in respect of the problem concerned at the 6th Conference of Parties.

With this in view, we have the honor to invite you to take part in the International scientific conference

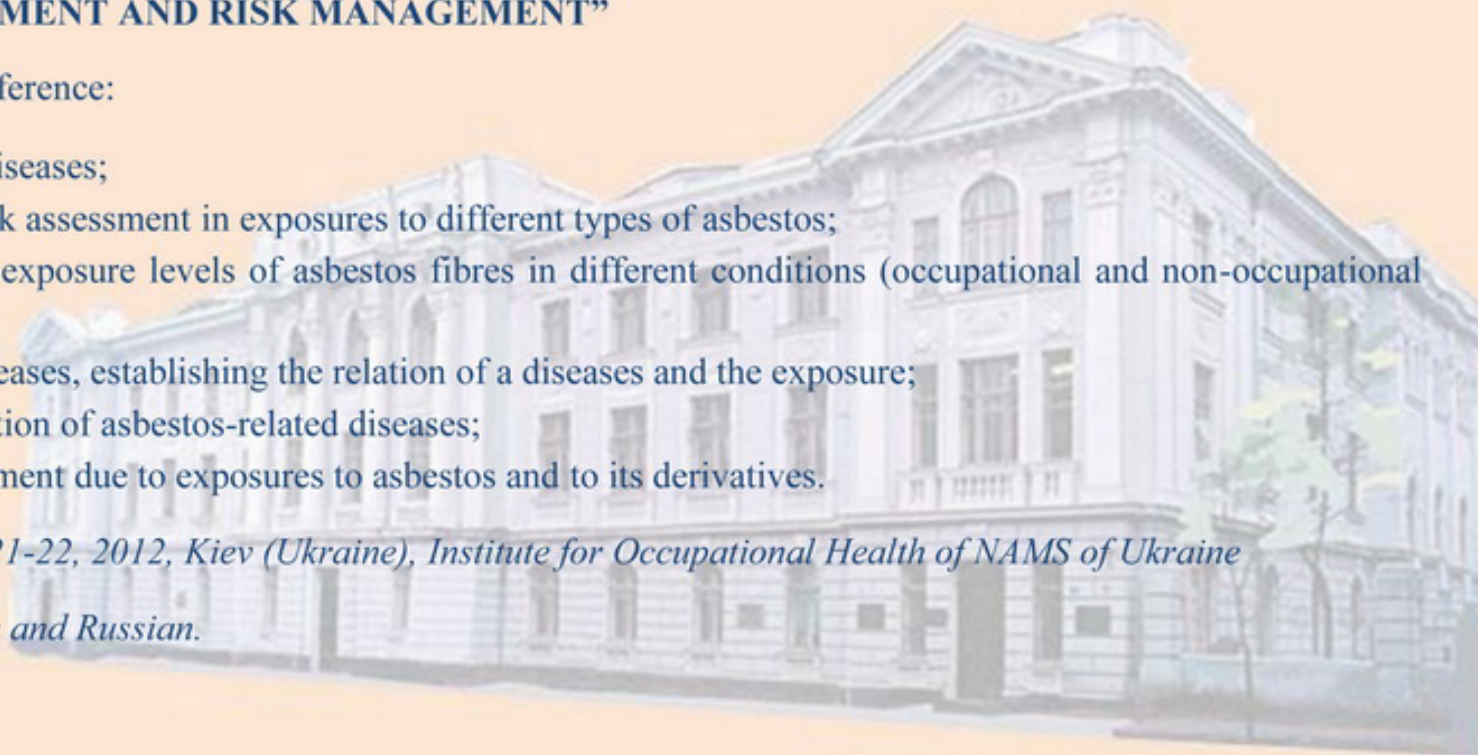

“CHRYBOTILE ASBESTOS: ASSESSMENT AND RISK MANAGEMENT”

Main problems to be discussed at the Conference:

- Epidemiology of asbestos-related diseases;
- Modern data on the comparative risk assessment in exposures to different types of asbestos;
- Modern studies on assessment of exposure levels of asbestos fibres in different conditions (occupational and non-occupational exposures);
- Diagnostics of asbestos-related diseases, establishing the relation of a diseases and the exposure;
