<b>NOTIFICATIONS OF FINAL REGULATORY ACTION FOR CHEMICALS NOT INCLUDED IN ANNEX III .....</b>		<b>457</b>
 <b>APPENDIX VI</b>		
<b>INFORMATION EXCHANGE ON CHEMICALS RECOMMENDED BY THE CHEMICAL REVIEW COMMITTEE FOR LISTING IN ANNEX III BUT FOR WHICH THE CONFERENCE OF THE PARTIES HAS YET TO TAKE A FINAL DECISION .....</b>		<b>471</b>

## INTRODUCTION

### 1. THE PURPOSE OF THE PIC CIRCULAR

The Rotterdam Convention on the Prior Informed Consent Procedure for Certain Hazardous Chemicals in International Trade entered into force on 24 February 2004.

The purpose of the PIC Circular is to provide all Parties, through their Designated National Authorities (DNAs), with the information required to be circulated by the Secretariat in line with Articles 4, 5, 6, 7, 10, 11, 13 and 14. The Decision Guidance Documents to be dispatched to Parties in line with Article 7, paragraph 3, are sent out in a separate communication.

The PIC Circular is published every six months, in June and December, respectively. The present Circular contains information related to the period from 1 November 2012 to 30 April 2013. In order to allow time for processing the information received in preparation of the PIC Circular, information received after 30 April 2013 has generally not been included, and will be included in the next PIC Circular.

Considerable efforts have been made by the Secretariat to ensure that the information included in the PIC Circular is both complete and accurate. DNAs are requested to review the information relating to their countries and communicate any inconsistencies, errors or omissions to the attention of the Secretariat.

### 2. IMPLEMENTATION OF THE ROTTERDAM CONVENTION

#### 2.1 Designated national authorities (Article 4 of the Convention)

In line with Article 4, paragraph 4 of the Convention, the Secretariat shall inform Parties of new nominations or changes in nominations of Designated National Authorities (DNAs). A complete Register of DNAs containing all contact details is distributed together with the present PIC Circular. DNAs can also access this information on the Rotterdam Convention website ([www.pic.int](http://www.pic.int)).

#### 2.2 Notifications of final regulatory action to ban or severely restrict a chemical (Article 5 of the Convention)

In line with Article 5, paragraph 3, of the Convention, the Secretariat circulates summaries of notifications of final regulatory action that have been verified to contain the information required by Annex I of the Convention. In addition, the Secretariat circulates a synopsis of all of the notifications of final regulatory action received, including information regarding those notifications that do not contain all the information required by Annex I of the Convention.

A synopsis of all notifications of final regulatory action to ban or severely restrict chemicals received from Parties since the last PIC Circular has been prepared. Part A of **Appendix I** of the PIC Circular contains a summary of the individual notifications verified to meet the information requirements of Annex I of the Convention. Part B contains a list of notifications received, over the same period, that have been verified not to meet the information requirements of Annex I of the Convention. Finally, Part C lists notifications received which are still under verification by the Secretariat.

Part A of **Appendix V** contains a tabular summary of all the notifications of final regulatory action for banned or severely restricted chemicals that are not listed in Annex III that were received from Parties from September 1998 to the present, and verified as meeting the information requirements of Annex I of the Convention. Once an additional notification verified as meeting the information requirements of Annex I has been submitted from a second PIC region for one of these chemicals, it will then be forwarded to the Chemical Review Committee for consideration as a candidate chemical for inclusion in Annex III of the Convention.

Parties that have adopted final regulatory actions are to notify the Secretariat within the timeframes established in Article 5, paragraphs 1 and 2. The Secretariat would like to draw the attention of Parties to the chemicals for which at least one complete notification already exists and encourage Parties to accord priority to those chemicals in preparing notifications of final regulatory action.

Part B of Appendix V contains a list of all notifications received, over the same period, that have been verified not to meet the information requirements of Annex I of the Convention.

Information on notifications submitted by Parties for the chemicals listed in Annex III of the Convention verified as meeting the information requirements of Annex I of the Convention have been included on the Convention website ([www.pic.int](http://www.pic.int)) in the section titled “Database of notifications.”

Finally, a synopsis of all notifications received before the adoption of the Convention (under the original PIC procedure) was published in PIC Circular X in December 1999 and is available from the Rotterdam Convention website ([www.pic.int](http://www.pic.int)). The notifications submitted before the adoption of the Convention do not meet the requirements of Annex I because the information requirements for notification under the original PIC procedure were different than those of the Convention. It is to be noted that although Parties are not obliged to resubmit notifications submitted under the original PIC procedure (paragraph 2 of Article 5 of the Convention), they may wish to consider doing so for those chemicals not presently listed in Annex III, in the event that sufficient supporting information is available.

In order to facilitate the submission of notifications, a *Form for notification of final regulatory action to ban or severely restrict a chemical* and guidance on how to complete it have been developed. Copies of the form and the instructions can be obtained from the Rotterdam Convention website ([www.pic.int](http://www.pic.int)) or the Secretariat ([pic@fao.org](mailto:pic@fao.org) or [pic@pic.int](mailto:pic@pic.int)) upon request. When a notification of final regulatory action is submitted, the date of issue, signature of the DNA and official seal must be provided for each individual form to ensure its official status.

### **2.3 Proposals for inclusion of severely hazardous pesticide formulations** (Article 6 of the Convention)

In line with Article 6, paragraph 2, of the Convention, the Secretariat circulates summaries of those proposals for inclusion of severely hazardous pesticide formulations in the PIC procedure, which the Secretariat has verified to contain the information required by Part 1 of Annex IV of the Convention.

Summaries of proposals received from Parties are provided in Part A of **Appendix II** of the PIC Circular. Parties that have submitted proposals which are still under verification by the Secretariat are listed in Part B of this Appendix.

No proposals for the inclusion of a Severely Hazardous Pesticide Formulation have been submitted since the last PIC Circular.

In order to facilitate the submission of proposals, an *Incident report form for human health incidents involving Severely Hazardous Pesticide Formulations* and an *Incident report form for environmental incidents involving Severely Hazardous Pesticide Formulations* have been developed. Copies of these forms and instructions may be obtained from the Rotterdam Convention website ([www.pic.int](http://www.pic.int)) or the Secretariat ([pic@fao.org](mailto:pic@fao.org) or [pic@pic.int](mailto:pic@pic.int)) upon request.

When a proposal is submitted, the date of issue, signature of the DNA and official seal must be provided for each individual form to ensure its official status.

## 2.4 Chemicals subject to the PIC procedure and distribution of Decision Guidance Documents (Article 7 of the Convention)

*Appendix III* of the PIC Circular lists all chemicals that are currently listed in Annex III of the Convention and subject to the PIC procedure, their categories (pesticide, industrial chemical and severely hazardous pesticide formulation) and the date of first dispatch of the corresponding Decision Guidance Document to DNAs.

The Sixth Session of the Conference of the Parties (28 April - 10 May 2013), in decisions RC-6/4, RC-6/5, RC-6/6 and RC-6/7, agreed to make the following chemicals subject to the Prior Informed Consent Procedure and to list them in Annex III of the Rotterdam Convention as follows:

Chemical	Relevant CAS number(s)	Category
Azinphos-methyl	86-50-0	Pesticide
Commercial octabromodiphenyl ether including: - Hexabromodiphenyl ether - Heptabromodiphenyl ether	36483-60-0 68928-80-3	Industrial
Commercial pentabromodiphenyl ether including: - Tetrabromodiphenyl ether - Pentabromodiphenyl ether	40088-47-9 32534-81-9	Industrial
Perfluorooctane sulfonic acid, perfluorooctane sulfonates, perfluorooctane sulfonamides and perfluorooctane sulfonyls including: - Perfluorooctane sulfonic acid - Potassium perfluorooctane sulfonate - Lithium perfluorooctane sulfonate - Ammonium perfluorooctane sulfonate - Diethanolammonium perfluorooctane sulfonate - Tetraethylammonium perfluorooctane sulfonate - Didecyltrimethylammonium perfluorooctane sulfonate - N-Ethylperfluorooctane sulfonamide - N-Methylperfluorooctane sulfonamide - N-Ethyl-N-(2-hydroxyethyl) perfluorooctane sulfonamide - N-(2-Hydroxyethyl)-N-methylperfluorooctane sulfonamide - Perfluorooctane sulfonyl fluoride	1763-23-1 2795-39-3 29457-72-5 29081-56-9 70225-14-8 56773-42-3 251099-16-8 4151-50-2 31506-32-8 1691-99-2 24448-09-7 307-35-7	Industrial

In line with paragraph 2 of Article 10 of the Convention, the Decision Guidance Documents for each of these chemicals will be circulated on 10 August 2013, along with a request that DNAs provide an import response within nine months.

## 2.5 Export Notifications (Article 12 of the Convention)

Article 12 and Annex V of the Convention set out the provisions and information requirements related to export notifications. Where a chemical is banned or severely restricted by a Party, that Party shall provide an export notification to the importing Party. The importing Party has the obligation to acknowledge receipt of the export notification within 30 days.

The Conference of the Parties at its third meeting requested the Secretariat to develop a standard form for export notification in order to assist Parties in meeting their obligations under the Convention. Copies of the form may be obtained from the Rotterdam Convention website ([www.pic.int](http://www.pic.int)) or the Secretariat upon request ([pic@fao.org](mailto:pic@fao.org) or [pic@pic.int](mailto:pic@pic.int)).

Parties are encouraged to use this form when making or acknowledging receipt of export notifications. Where there are forms that have been developed at the national level that meet the information requirements of Annex V of the Convention they may continue to be used.

## **2.6 Information to accompany exported chemicals (Article 13, paragraph 1, of the Convention)**

In accordance with Article 13, paragraph 1, of the Convention, the World Customs Organization (WCO) has assigned specific Harmonized System (HS) customs codes to the individual chemicals or groups of chemicals listed in Annex III to the Rotterdam Convention. These codes entered into force on 1 January 2007.

Each Party shall require that for a chemical listed in Annex III and for which a HS customs code has been assigned, the shipping document carries this assigned code when the chemical is exported.

A table containing this information is also available on the Rotterdam Convention website ([www.pic.int](http://www.pic.int)).

## **2.7 Transmittal of a response concerning future import of a chemical (Article 10, paragraphs 2, 3 and 4 of the Convention)**

In accordance with Article 10, paragraph 2 of the Convention, each Party shall transmit to the Secretariat, as soon as possible, and in any event not later than nine months after the date of dispatch of the Decision Guidance Document, a response concerning the future import of the chemical concerned. If a Party modifies this response, the DNA shall forthwith submit the revised response to the Secretariat.

Article 10, paragraph 7, of the Convention states that, each Party shall, no later than the date of entry into force of the Convention for that Party; transmit import response to the Secretariat for each of the chemicals listed in Annex III of the Convention.

In line with Article 10, paragraph 4 of the Convention, the response shall consist of either a final decision or an interim response. The interim response may include an interim decision regarding import. The response must relate to the category or categories specified for the chemical in Annex III of the Convention.

As of 30 April 2013, 92 Parties have not yet provided import responses for one or more of the chemicals listed in Annex III to the Convention and, among these, the following 17 Parties have failed to provide any import responses: Afghanistan, Botswana, Cambodia, Djibouti, Equatorial Guinea, Lesotho, Maldives, Marshall Islands, Montenegro, Namibia, Russian Federation, Saint Kitts and Nevis, Saint Vincent and the Grenadines, Somalia, Swaziland, Tonga and Ukraine.

When the Convention enters into force for new Parties, the Secretariat sends a welcome package to the DNA. The package contains all information relevant to the implementation of the Convention together with the request for the submission of the outstanding import responses.

The list of “Cases of failure to transmit a response” in Appendix IV of the PIC Circular serves as a further reminder of the need to submit import responses for all chemicals in Annex III.

In order to facilitate the submission of responses regarding import, a *Form for import response* and guidance on how to complete it have been developed. Copies of the form and the instructions can be obtained from the Rotterdam Convention website ([www.pic.int](http://www.pic.int)) or the Secretariat ([pic@fao.org](mailto:pic@fao.org) or [pic@pic.int](mailto:pic@pic.int)) upon request.

When an import response is submitted, the date of issue, signature of the DNA and official seal must be provided for each individual form to ensure its official status.

## **2.8 Information on responses received concerning future import of a chemical** (Article 10, paragraph 10 and Article 11, paragraph 2, of the Convention)

Paragraph 10 of Article 10 states that the Secretariat shall, every six months, inform all Parties of the responses received regarding future import, including a description of the legislative or administration measures on which the decisions have been based, where available, and information on cases of failure on their part to transmit a response.

**Appendix IV** of the PIC Circular contains information on the import responses submitted by Parties for chemicals in Annex III of the Convention. Part 1 includes those import responses received in the period between 1 November 2012 and 30 April 2013. Part 2 includes a full listing of all of the import responses received from all Parties up to 30 April 2013 and Part 3 lists the cases of failure to transmit a response for each chemical and the date on which the Secretariat first informed all Parties, through publication of the PIC Circular, of the failure of a Party to transmit an import response.

The information in this appendix has been arranged according to the sequence of the individual chemicals as they are listed in Annex III of the Convention (and reproduced as Appendix III of the PIC Circular). The import responses relate to the category or categories specified for each chemical in Appendix III of the PIC Circular. Please note that any response not addressing importation is considered as an interim response that does not contain an interim decision.

The Secretariat encourages Parties to submit the outstanding import responses for each of the 43 chemicals listed in Annex III to the Convention and wishes to draw the attention of DNAs to Article 11, paragraph 2, of the Convention in relation to the failure to transmit a response or the transmission of an interim response that does not contain an interim decision.

## **2.9 Information exchange on chemicals recommended by the Chemical Review Committee for listing in Annex II I but for which the Conference of the Parties has yet to take a final decision** (COP decisions RC.3/3, RC.4/4 and RC.6/8)

Article 14, paragraph 1, states that each Party shall, as appropriate and in accordance with the objective of this Convention, facilitate: a) the exchange of scientific, technical, economic and legal information concerning the chemicals within the scope of this Convention, including toxicological, ecotoxicological and safety information; b) the provision of publicly available information on domestic regulatory actions relevant to the objectives of this Convention; and c) the provision of information to other Parties, directly or through the Secretariat, on domestic regulatory actions that substantially restrict one or more uses of the chemical, as appropriate.

The Conference of the Parties (COP), in decisions RC.3/3 and RC.4/4 on chrysotile asbestos and RC.6/8 on liquid formulations (emulsifiable concentrate and soluble concentrate) containing paraquat dichloride at or above 276 g/L, corresponding to paraquat ion at or above 200 g/L, encouraged Parties to make use of all information available on these chemicals, to assist others, in particular developing countries and countries with economies in transition, to make informed decisions regarding their import and management and to inform other Parties of these decisions using the information exchange provisions in Article 14 of the Convention. The full text of these decisions may be found in Annex I of the reports of the respective COP meetings (UNEP/FAO/RC/COP.3/26, UNEP/FAO/RC/COP.4/24, and UNEP/FAO/RC/COP.6/20).

In line with these decisions and in the interest of promoting information exchange on these chemicals, **Appendix VI** of the PIC Circular has been added to the Circular and divided into two parts:

**Part 1** provides a reference to the information that has been provided by Parties on national decisions concerning the management of chrysotile asbestos and liquid formulations (emulsifiable concentrate and soluble concentrate) containing paraquat dichloride at or above 276 g/L, corresponding to paraquat ion at or above 200 g/L. It is a tabular summary which provides details on the Party that submitted the information, the PIC Circular the information was circulated in, and the web link to the Rotterdam Convention website where the information may be found. In

the section “Chemicals recommended for listing” on the Rotterdam Convention website, there is further information on this chemical including the notifications of final regulatory action and supporting documentation that was made available to the Chemical Review Committee and the draft Decision Guidance Documents.

**Part 2** is a list of decisions on the future import of chrysotile asbestos and liquid formulations (emulsifiable concentrate and soluble concentrate) containing paraquat dichloride at or above 276 g/L, corresponding to paraquat ion at or above 200 g/L that have been submitted by Parties under Article 14. These import decisions are circulated for information only and do not constitute part of the legally binding PIC procedure.

This information, as well as further information relevant to the work of the Chemical Review Committee on this chemical, may be accessed directly on the Rotterdam Convention website ([www.pic.int](http://www.pic.int)).

## **2.10 Information on transit movements (Article 14, paragraph 5, of the Convention)**

As outlined in Article 14, paragraph 5, of the Convention, any Party requiring information on transit movements through its territory of chemicals listed in Annex III may report its need to the Secretariat, which shall inform all Parties accordingly.

Since the last PIC Circular, no Party has reported to the Secretariat its need for information on transit movements through its territory of Annex III chemicals.

## **3. ADDITIONAL INFORMATION FOR DNAs**

### **3.1 Information on the status of ratification of the Convention**

The Convention entered into force on 24 February 2004, 90 days after the date of the deposit of the 50<sup>th</sup> instrument of ratification, acceptance, approval or accession. For each State or regional economic integration organization that ratifies, accepts or approves this Convention or accedes thereto after 24 February 2004, the Convention shall enter into force on the ninetieth day after the date of deposit by such State or regional economic integration organization of its instrument of ratification, acceptance, approval or accession.

As of 30 April 2013 there were 152 Parties to the Rotterdam Convention. The Parties are:

Afghanistan, Albania, Antigua and Barbuda, Argentina, Armenia, Australia, Austria, Bahrain, Belgium, Belize, Benin, Bolivia, Bosnia and Herzegovina, Botswana, Brazil, Bulgaria, Burkina Faso, Burundi, Cambodia, Cameroon, Canada, Cape Verde, Chad, Chile, China, Colombia, Congo (Democratic Republic of), Congo (Republic of), Cook Islands, Costa Rica, Côte d'Ivoire, Croatia, Cuba, Cyprus, Czech Republic, Denmark, Djibouti, Dominica, Dominican Republic, Ecuador, El Salvador, Equatorial Guinea, Eritrea, Estonia, Ethiopia, European Union, Finland, France, Gabon, Gambia, Georgia, Germany, Ghana, Greece, Guatemala, Guinea, Guinea-Bissau, Guyana, Honduras, Hungary, India, Iran (Islamic Republic of), Ireland, Israel, Italy, Jamaica, Japan, Jordan, Kazakhstan, Kenya, Korea (Democratic People's Republic of), Korea (Republic of), Kuwait, Kyrgyzstan, Lao People's Democratic Republic, Latvia, Lebanon, Lesotho, Liberia, Libyan Arab Jamahiriya, Liechtenstein, Lithuania, Luxembourg, Macedonia (the Former Yugoslav Republic of), Madagascar, Malawi, Malaysia, Maldives, Mali, Marshall Islands, Mauritania, Mauritius, Mexico, Moldova (Republic of), Mongolia, Montenegro, Morocco, Mozambique, Namibia, Nepal, Netherlands, New Zealand, Nicaragua, Niger, Nigeria, Norway, Oman, Pakistan, Panama, Paraguay, Peru, Philippines, Poland, Portugal, Qatar, Romania, Russian Federation, Rwanda, Saint Kitts and Nevis, Saint Vincent and the Grenadines, Samoa, Saudi Arabia, Senegal, Serbia, Singapore, Slovakia, Slovenia, Somalia, South Africa, Spain, Sri Lanka, Sudan, Suriname, Sweden, Swaziland, Switzerland, Syrian Arab Republic, Tanzania (United Republic of), Thailand, Togo, Tonga, Trinidad and Tobago, Uganda,

Ukraine, United Arab Emirates, United Kingdom, Uruguay, Venezuela, Vietnam, Yemen, Zambia and Zimbabwe.

For those States that become Parties to the Convention after 30 April 2013, all information will be reported in the next PIC Circular.

The Convention website ([www.pic.int](http://www.pic.int)) gives a complete and up to date list of the States and regional economic integration organizations that have ratified the Rotterdam Convention.

### **3.2 List of documents in support of the implementation of the Rotterdam Convention**

The following are documents relevant to the implementation of Rotterdam Convention. They can be obtained from the Rotterdam Convention website ([www.pic.int](http://www.pic.int)) or the Secretariat ([pic@fao.org](mailto:pic@fao.org) or [pic@pic.int](mailto:pic@pic.int)) upon request.

- Rotterdam Convention on the Prior Informed Consent Procedure for Certain Hazardous Chemicals and Pesticides in International Trade (*available in Arabic, Chinese, English, French, Russian and Spanish*);
- Decision guidance documents for each of the chemicals in Annex III of the Convention (*available in English, French and Spanish*);
- Form and instructions for notification of final regulatory action to ban or severely restrict a chemical (*available in English, French and Spanish*);
- Form and instructions for import response (*available in English, French and Spanish*);
- Form and instructions for reporting human health incidents and environmental incidents relating to Severely Hazardous Pesticide Formulations (SHPF) (*available in English, French and Spanish*);
- Export notification form and instructions (*available in English, French and Spanish*);
- Form for nomination of a Designated National Authority (*available in English, French and Spanish*);
- All past PIC Circulars (*available in English, French and Spanish*);
- Register of Designated National Authorities for the Rotterdam Convention (*available in English*).

### **3.3 Resource kit of information on the Rotterdam Convention**

The Resource Kit is a collection of publications containing information on the Rotterdam Convention. It has been developed with a range of end-users in mind, including the general public, DNAs and stakeholders involved in the implementation of the Convention. It includes elements to assist in awareness-raising activities and detailed technical information and training materials aimed at facilitating implementation of the Convention. All documents contained in the Resource Kit can be obtained from the Rotterdam Convention website ([www.pic.int](http://www.pic.int)) or the Secretariat upon request ([pic@fao.org](mailto:pic@fao.org) or [pic@pic.int](mailto:pic@pic.int)).

The Stepwise Guide is a document developed as an introduction to the Resource Kit and the publications it includes. It provides a brief outline of the content of each publication, indicates the target audience and lists the languages in which they are available (most publications are available in six languages).

#### *Guidance to complete the form for notification of final regulatory action*

A publication containing guidance is available to assist Designated National Authorities (DNAs) in completing the Form for Notification of Final Regulatory Action, with the objective of improving understanding of the information requested and facilitating the preparation and submission of notifications that are complete against the information requirements of Annex I of the Convention. The guidance is available on the Convention website at:

<http://www.pic.int/Implementation/ResourceKit/tabid/1064/language/en-US/Default.aspx>.

Under Article 5 of the Rotterdam Convention, Parties have an obligation to notify the Secretariat when they take a final regulatory action to ban or severely restrict a chemical. These notifications play an

important role in the exchange of information on hazardous chemicals and identification of candidate chemicals for the PIC procedure.

The guidance to assist in completing the Form for Notification of Final Regulatory Action has been developed based on the experience of the Secretariat as well as the lessons learned by members of the Chemical Review Committee. This guidance is considered a work-in-progress that will continue to evolve and be updated as experience is gained and more feedback from Parties is received. Parties are encouraged to send comments on the guidance to the Secretariat at [pic@fao.org](mailto:pic@fao.org) or [pic@pic.int](mailto:pic@pic.int).

**The Secretariat can be contacted at the following addresses if there are any queries regarding aspects of the development and operation of the Rotterdam Convention:**

## APPENDIX I

### SYNOPSIS OF NOTIFICATIONS OF FINAL REGULATORY ACTION RECEIVED SINCE THE LAST PIC CIRCULAR

This appendix consists of three parts:

**Part A: Summary of each Notification of Final Regulatory Action that has been verified to contain all the information requirements of Annex I of the Convention**

Notifications of final regulatory action that have been verified to contain all the information requirements of Annex I of the Convention, received between 1 November 2012 and 30 April 2013.

**Part B: Information on Notifications of Final Regulatory Action that have been verified to not contain all the information requirements of Annex I of the Convention**

Notifications of final regulatory action that have been verified to not contain all the information requirements of Annex I of the Convention, received between 1 November 2012 and 30 April 2013.

**Part C: Notifications of Final Regulatory Action still under verification**

Notifications of final regulatory action that have been received by the Secretariat but for which the verification process has not yet been completed.

## Synopsis of Notifications of Final Regulatory Action Received Since the Last PIC Circular

### PART A

#### SUMMARY OF EACH NOTIFICATION OF FINAL REGULATORY ACTION THAT HAS BEEN VERIFIED TO CONTAIN ALL THE INFORMATION REQUIREMENTS OF ANNEX I OF THE CONVENTION

Notifications of final regulatory action that have been verified to contain all the information requirements of by Annex I of the Convention, received between 1 November 2012 and 30 April 2013.

#### EUROPEAN UNION

<b>Common Name(s):</b> Chlorthal-dimethyl	<b>CAS number(s):</b> 1861-32-1
---	---------------------------------

**Chemical Name:** 1,4-Benzenedicarboxylic acid, 2,3,5,6-tetrachloro-, dimethyl ester

**Final regulatory action has been taken for the category:** Pesticide

**Final regulatory action:** The chemical is Banned

**Use or uses prohibited by the final regulatory action:** All applications as a plant protection product.

**Use or uses that remain allowed:** Not relevant.

**The final regulatory action was based on a risk or hazard evaluation:** Yes

**Summary of the final regulatory action:** It is prohibited to place on the market or use plant protection products containing chlorthal-dimethyl. Chlorthal-dimethyl is not included in the list of approved active substances under Regulation (EC) No. 1107/2009 concerning the placing of plant protection products on the market, which replaces Directive 91/414/EEC.

Authorisations for plant protection products containing chlorthal-dimethyl had to be withdrawn by 23 March 2010. As of 24 September 2009 no authorisations for plant protection products containing chlorthal-dimethyl were allowed to be granted or renewed by the Member States and all uses of plant protection products containing chlorthal-dimethyl are prohibited as from 23 March 2011.

**The reasons for the final regulatory action were relevant to:** Human health and environment

**Summary of known hazards and risks to human health:** It was concluded that it was not demonstrated that it may be expected that plant protection products containing chlorthal-dimethyl satisfy in general the requirements laid down in Article 5(1) of Directive 91/414/EEC.

It was proposed to classify chlorthal-dimethyl as carcinogen category 3; R40 "Limited evidence of carcinogenic effect" and R64 "May cause harm to breastfed babies". However, the studies presented are old (from 1963) and are not adequate for the purpose of clarifying the carcinogenic properties of the active substance. Chlorthal-dimethyl is considered of low acute oral, dermal and inhalation toxicity.

During the evaluation of chlorthal-dimethyl it was found that its metabolite MPA leaches to groundwater and there were concerns as regards toxicological significance of that metabolite. The active substance is proposed to be classified as carcinogen category 3 and no convincing evidence has been provided that the metabolite MPA will not lead to any risk of carcinogenicity, therefore it must be considered relevant.

Data from employees at the production plant regarding clinical signs and symptoms of poisoning revealed that acute overexposure may be slightly irritating to the eyes, ingestion may cause upset stomach and chronic overexposure may show evidence of liver and thyroid gland toxicity.

**Expected effect of the final regulatory action in relation to human health:** Reduction of risk from the use of plant protection products containing chlorthal-dimethyl.

**Summary of known hazards and risks to the environment:** It was concluded that it was not demonstrated that it may be expected that plant protection products containing chlorthal-dimethyl satisfy in general the requirements laid down in Article 5(1) of Directive 91/414/EEC.

During the evaluation of chlorthal-dimethyl it was found that its metabolite MPA leaches to groundwater and there were concerns as regards toxicological significance of that metabolite.

The active substance is proposed to be classified as carcinogen category 3 and no convincing evidence has been provided that the metabolite MPA will not lead to any risk of carcinogenicity, therefore it must be considered relevant.

According to the evaluation presented in the DAR for the section on fate and behaviour the metabolite MPA exceeds the concentration in the groundwater of 0.1 µg/L in all modelling scenarios.

Chlorthal-dimethyl is proposed to be classified as N "Dangerous for the environment"; R51/53 "Toxic to aquatic organisms, may cause long term adverse effects in the aquatic environment".

**Expected effect of the final regulatory action in relation to the environment:** Reduction of risk from the use of plant protection products containing chlorthal-dimethyl.

**Date of entry into force of the final regulatory action:** 23/03/2011

Complete entry into force of all provisions of Commission Decision 2009/715/EC of 23 September 2009 is 23 March 2011 since all uses of plant products containing chlorthal-dimethyl were prohibited as from that date at the latest.

## EUROPEAN UNION

<b>Common Name(s):</b> Fenarimol	<b>CAS number(s):</b> 60168-88-9
----------------------------------	----------------------------------

**Chemical Name:** 5-Pyrimidinemethanol, .alpha.-(2-chlorophenyl)-.alpha.-(4-chlorophenyl)-

**Final regulatory action has been taken for the category:** Pesticide

**Final regulatory action:** The chemical is severely restricted

**Use or uses prohibited by the final regulatory action:** Part A of the Annex to Commission Directive 2006/134/EC provided for a list of uses (crops and maximum quantity of the active substance) that were in principle allowed, which means that Member States were allowed to grant national authorisations within those limits. All other uses not included in that list, i.e. other crops and higher quantities of the active substance, were prohibited.

In addition, the following uses were not allowed to be authorised by Member States:

- air application,
- knapsack and hand-held applications by amateur users,
- home gardening.

**Use or uses that remain allowed:** The use of plant protection products containing fenarimol was only authorised as a fungicide on tomatoes, peppers in greenhouses, aubergines, cucumbers in greenhouses, melons and ornamentals, nursery trees and perennial plants.

The rates were not allowed to exceed:

- 0.058 kg a.s. per hectare per application for tomatoes in field and 0.072 kg a.s. per hectare per application for tomatoes in greenhouses,
- 0.072 kg a.s. per hectare per application for peppers,
- 0.038 kg a.s. per hectare per application for aubergines,
- 0.048 kg a.s. per hectare per application for cucumbers,
- 0.024 kg a.s. per hectare per application for melons in field and 0.048 kg a.s. per hectare per

application for melons in greenhouse,

- 0.054 kg a.s. per hectare per application for ornamentals, nursery trees and perennial plants in field and 0.042 kg a.s. per hectare per application for ornamentals in greenhouses.

Member States had to ensure that all appropriate risk mitigation measures were applied. Particular attention had to be paid to the protection of:

- aquatic organisms. Where relevant, an appropriate distance had to be kept between treated areas and surface water bodies;
- earthworms. Conditions of authorisation had to include risk mitigation measures,
- birds and mammals. Conditions of authorisation needed to include risk mitigation measures;
- operators, who were required to wear suitable protective clothing during mixing, loading, application and cleaning of the equipment;
- workers, who needed to wear suitable protective clothing, in particular gloves, if they had to enter a treated area before the specific re-entry period had expired.

***The final regulatory action was based on a risk or hazard evaluation:*** Yes

***Summary of the final regulatory action:*** Commission Directive 2006/134/EC of 11 December 2006 amending Directive 91/414/EEC severely restricted the placing on the market and use of plant protection products containing fenarimol.

The Commission Directive amended Annex I to Directive 91/414/EEC (which was replaced by Regulation (EC) No 1107/2009 concerning the placing of plant protection products on the market) to permit the use of fenarimol from 1 January 2007 to 30 June 2008. It also set in place restrictions on the use of fenarimol. The Directive imposed on the Member States a requirement to review all authorisations of fenarimol to ensure that the restrictions set in Directive 2006/134/EC were respected as of 30 June 2007. It also required a re-evaluation of all authorised plant protection products containing fenarimol by 30 June 2008.

The restrictions limited the application of fenarimol to specific crops and defined maximum quantities. It also prohibited specific uses and limited the period of fenarimol's inclusion in Annex I to Directive 91/414/EEC to 18 months after entry into force of Directive 2006/134 on 1 January 2007.

It should be noted that this period has now expired. As of 30 June 2008, fenarimol is no longer included in the list of authorised active substances in Annex I. Hence, fenarimol is no longer allowed to be used as plant protection product in the European Union.

***The reasons for the final regulatory action were relevant to:*** Human health and environment

***Summary of known hazards and risks to human health:*** It was concluded that it could be expected that plant protection products containing fenarimol would fulfil the safety requirements laid down in Article 5(1)(a) and (b) of Directive 91/414/EEC. This conclusion was however subject to compliance with the particular requirements in sections 4, 5, 6 and 7 of the review report, as well as to the implementation of the provisions of Article 4(1) and the uniform principles laid down in Annex VI of Directive 91/414/EEC, for each fenarimol containing plant protection product for which Member States would grant or review the authorisation.

Therefore, Member States were requested to pay particular attention to the protection of

- operators, who were required to wear suitable protective clothing, in particular gloves, coveralls, rubber boots and face protection or safety glasses during mixing, loading, application and cleaning of the equipment, unless the exposure to the substance is adequately precluded by the design and construction of the equipment itself or by the mounting of specific protective components on such equipment;
- workers, who needed to wear suitable protective clothing, in particular gloves, if they had to enter a treated area before the specific re-entry period has expired.

Member States were requested to ensure that the authorisation holders reported at the latest on 31 December of each year on incidences of operator health problems. Member States could require that elements, such as sales data and a survey of use patterns, were provided so that a realistic picture of

the use conditions and the possible toxicological impact of fenarimol could be obtained.

It was concluded that the effects of fenarimol on male fertility seen in rats were relevant for human risk assessment, although man is less sensitive to aromatase inhibition. With fenarimol, there is a possible risk of impaired fertility, a possible risk of harm to the unborn child and fenarimol may cause harm to breastfed babies.

Annex I Part B of the Commission Directive 2006/134/EC recognized that no internationally accepted method of test for endocrine disruptor properties had been agreed at that time. It provided that once the test guidelines on endocrine disruptors under discussion at OECD have been adopted, that Member States request the submission of additional studies on possible endocrine disruptor properties of the products.

***Expected effect of the final regulatory action in relation to human health:*** Reduction of risk from the use of plant protection products containing fenarimol.

***Summary of known hazards and risks to the environment:*** It was concluded that it could be expected that plant protection products containing fenarimol would fulfil the safety requirements laid down in Article 5(1)(a) and (b) of Directive 91/414/EEC. This conclusion was however subject to compliance with the particular requirements in sections 4, 5, 6 and 7 of the review report, as well as to the implementation of the provisions of Article 4(1) and the uniform principles laid down in Annex VI of Directive 91/414/EEC, for each fenarimol containing plant protection product for which Member States would grant or review the authorisation.

Therefore, Member States had to ensure that all appropriate risk mitigation measures were applied. Member States were requested to pay particular attention to the protection of

- aquatic organisms. Where relevant, an appropriate distance needed to be kept between treated areas and surface water bodies. This distance could depend of the application or not of drift reducing techniques or devices;
- earthworms. Conditions of authorisation had to include risk mitigation measures, such as the selection of the most appropriate combination of numbers and timing of applications, rates of application, and, if necessary, the degree of concentration of the active substance;
- birds and mammals. Conditions of authorisation had to include risk mitigation measures, such as a judicious timing of the application and the selection of those formulations which, as a result of their physical presentation or the presence of agents that ensure an adequate avoidance, minimise the exposure of the concerned species.

In addition, Member States were requested to require further studies to address the potential endocrine disrupting properties of fenarimol within two years after the adoption of the Test Guidelines on endocrine disruption by the Organisation for Economic Cooperation and Development (OECD).

***Expected effect of the final regulatory action in relation to the environment:*** Reduction of risk from the use of plant protection products containing fenarimol.

***Date of entry into force of the final regulatory action:*** 01/07/2007

Commission Directive 2006/134/EC of 11 December 2006 entered into force on 1 January 2007. However, Member States had to apply the provisions of this Directive as of 1 July 2007.

## EUROPEAN UNION

<b>Common Name(s):</b> Methamidophos	<b>CAS number(s):</b> 10265-92-6
--------------------------------------	----------------------------------

**Chemical Name:** O,S-dimethyl phosphoramidothioate

**Final regulatory action has been taken for the category:** Pesticide

**Final regulatory action:** The chemical is severely restricted

**Use or uses prohibited by the final regulatory action:** Part A of the Annex to Commission Directive 2006/131/EC provided for one single use on potato that was in principle allowed in the European Union and specified a maximum application rate and number of applications of the active substance, which means that Member States were allowed to grant national authorisations within those limits. All other uses not included in that list, i.e. other crops and higher rates of the active substance, were prohibited.

In addition, the following uses were not allowed to be authorised by Member States:

- air application,
- knapsack and all hand-held applications, neither by amateur nor by professional users,
- home gardening.

**Use or uses that remain allowed:** Methamidophos was only allowed to be used on potatoes.

The following conditions of use had to be respected:

- At rates not exceeding 0.5 kg active substance per hectare per application,
- Maximum 3 applications per season.

Member States were requested to ensure that all appropriate risk mitigation measures were applied.

Particular attention had to be paid to the protection of:

- birds and mammals. Conditions of authorisation needed to include risk mitigation measures, such as a judicious timing of the application and the selection of those formulations which, as a result of their physical presentation or the presence of agents that ensure an adequate avoidance, minimise the exposure of the concerned species,
- aquatic organisms and non-target arthropods. An appropriate distance had to be kept between treated areas and surface water bodies as well as margins of the crop. This distance could depend on the application or not of drift reducing techniques,
- operators, who needed to wear suitable protective clothing, in particular gloves, coveralls, rubber boots and respiratory protective devices during mixing and loading, and gloves, coveralls, rubber boots and face protection or safety glasses during application and cleaning of equipment. The above measures had to be applied, unless the exposure to the substance was adequately precluded by the design and construction of the equipment itself or by the mounting of specific protective components on such equipment.

**The final regulatory action was based on a risk or hazard evaluation:** Yes

**Summary of the final regulatory action:** Commission Directive 2006/131/EC of 11 December 2006 amending Directive 94/414/EEC severely restricted the placing on the market and use of plant protection products containing methamidophos.

The Commission Directive amended Annex I to Directive 91/414/EEC (which was replaced by Regulation (EC) No 1107/2009 concerning the placing of plant protection products on the market) to permit the use of methamidophos from 1 January 2007 to 30 June 2008. It also set in place restrictions on the use of methamidophos. The Directive imposed on the Member States a requirement to review all authorisations of methamidophos to ensure that the restrictions set in Directive 2006/131/EC were respected as of 30 June 2007. It also required a re-evaluation of products containing methamidophos by 30 June 2008.

The restrictions limited the application of methamidophos to only one specific crop (potato) and defined a maximum application rate and number of applications. It also prohibited specific uses and limited the period of inclusion of methamidophos in Annex I to Directive 94/414/EEC to 18 months

after entry into force of Directive 2006/131/EEC on 1 January 2007.

It should be noted that this period has now expired. As of 30 June 2008, methamidophos is no longer included in the list of authorised substances in Annex I. Hence, methamidophos is no longer allowed to be used as plant protection product in the European Union.

***The reasons for the final regulatory action were relevant to:*** Human health and environment

***Summary of known hazards and risks to human health:*** It was concluded that it could be expected that plant protection products containing methamidophos would fulfil the safety requirements laid down in Article 5(1)(a) and (b) of Directive 91/414/EEC. This conclusion was however subject to compliance with the particular requirements in sections 4, 5, 6 and 7 of the review report, as well as to the implementation of the provisions of Article 4(1) and the uniform principles laid down in Annex VI of Directive 91/414/EEC, for each methamidophos containing plant protection product for which Member States would grant or review the authorisation.

Therefore, Member States were requested to pay particular attention to the protection of operators who had to wear suitable protective clothing during mixing-loading and gloves, coveralls, rubber boots and face protection or safety glasses during application and cleaning of equipment. The above measures had to be applied, unless the exposure to the substance was adequately precluded by the design and construction of the equipment itself or by the mounting of specific protective components on such equipment.

Member States were requested to ensure that the authorisation holders report at the latest on 31 December of each year on any reported effect on operator health. Member States could require that elements, such as sales data and a survey of use patterns, are provided so that a realistic picture of the use conditions and the possible toxicological impact of methamidophos could be obtained.

Methamidophos is a cholinesterase inhibitor characterised by high acute toxicity. Methamidophos is classified "T+ - Very toxic" (Directive 67/548/EEC) and "Acute Tox. 2" (Regulation (EC) 1272/2008 implementing the GHS system).

The use of methamidophos may entail certain risks for consumers. Deterministic models indicated high risk for chronic and acute dietary intake especially for toddlers (consumption values taken from UK diet). The highest contributions to chronic risk came from consumption of plum fruit and tomatoes and the acute risk (ARfD) was high for all crops except for broccoli, cauliflower, cabbage and potato. A probabilistic model showed no acute risk. Intended uses have been reduced and new processing factors added. Based on the new list of uses, the deterministic model for estimating the chronic and acute intake of methamidophos through the diet did not show any risk for the general population.

***Expected effect of the final regulatory action in relation to human health:*** Reduction of risk from the use of plant protection products containing methamidophos.

***Summary of known hazards and risks to the environment:*** It was concluded that it could be expected that plant protection products containing methamidophos would fulfil the safety requirements laid down in Article 5(1)(a) and (b) of Directive 91/414/EEC. This conclusion was however subject to compliance with the particular requirements in sections 4, 5, 6 and 7 of the review report, as well as to the implementation of the provisions of Article 4(1) and the uniform principles laid down in Annex VI of Directive 91/414/EEC, for each methamidophos containing plant protection product for which Member States would grant or review the authorisation.

Therefore, Member States were requested to ensure that all appropriate risk mitigation measures were applied. Member States were requested to pay particular attention to the protection of

- birds and mammals. Conditions of authorisation needed to include risk mitigation measures, such as a judicious timing of the application and the selection of those formulations which, as a result of their physical presentation or the presence of agents that ensure an adequate avoidance, minimise the exposure of the concerned species,
- aquatic organisms and non-target arthropods. An appropriate distance had to be kept between treated areas and surface water bodies as well as margins of the crop. This distance could depend on the

application or not of drift reducing techniques.

The risk assessment revealed that toxicity/exposure ratios for a range of scenarios and aquatic and terrestrial organisms indicated acute and long-term concern for birds and acute risk for mammals for the use of methamidophos in potato fields. There was also acute and long-term risk for the aquatic organism, *Daphnia magna*, with methamidophos use in field and orchard crops and vegetables. The risk to beneficial arthropods was also high.

Further evaluation was conducted as to the consumption of methamidophos in the field by yellow wagtails and wood mice after reduction of insects by the insecticide. It was considered that consumption of dead insects would still take place. The role of avoidance by these animals (reduced consumption) of food treated with methamidophos was also considered but it appeared possible that feeding might be rapid enough for mortality to occur in field conditions. Preliminary consideration also suggested that other routes of exposure (drinking, dermal exposure and overspray of nesting birds) might be higher than risk from dietary exposure.

**Expected effect of the final regulatory action in relation to the environment:** Reduction of risk to the environment (e.g. birds, mammals and aquatic organisms) from the use of plant protection products containing methamidophos.

**Date of entry into force of the final regulatory action:** 01/07/2007

Commission Directive 2006/131/EC entered into force on 1 January 2007. However, Member States had to apply the provisions of this Directive from 1 July 2007.

## EUROPEAN UNION

<b>Common Name(s):</b> Procymidone	<b>CAS number(s):</b> 32809-16-8
------------------------------------	----------------------------------

**Chemical Name:** 3-Azabicyclo[3.1.0]hexane-2,4-dione, 3-(3,5-dichlorophenyl)-1,5-dimethyl-

**Final regulatory action has been taken for the category:** Pesticide

**Final regulatory action:** The chemical is severely restricted

**Use or uses prohibited by the final regulatory action:** Part A of the Annex to Commission Directive 2006/132/EC provided for two crops (cucumber in greenhouses (closed hydroponic systems) and plums (for processing)) on which the use of procymidone was in principle allowed and a maximum rate of 0,75g active substance per hectare per application. This means that Member States were allowed to grant national authorisations within those limits. All other uses not included in that list, i.e. other crops and higher rates of the active substance, were prohibited.

In addition, the following uses were not allowed to be authorised by Member States:

- air application,
- knapsack and hand-held applications neither by amateur nor by professional users,
- home gardening.

**Use or uses that remain allowed:** Only uses as fungicide on the following crops could be authorised:

- cucumbers in greenhouses (closed hydroponic systems),
  - plums (for processing),
- at rates not exceeding 0.75 g a.s per hectare per application.

Member States had to ensure that all appropriate risk mitigation measures were applied. Particular attention had to be paid to the protection of:

- aquatic organisms. Where relevant, an appropriate distance had to be kept between treated areas and surface water bodies;
- birds and mammals. Conditions of authorisation had to include risk mitigation measures;
- consumers. The acute dietary exposure of which needed to be controlled,

- groundwater, if the active substance were to be applied in regions with vulnerable soil and/or climatic conditions. Conditions of authorisation had to include risk mitigation measures;
- operators, who had to wear suitable protective clothing, in particular gloves, coveralls, rubber boots and face protection or safety glasses during mixing, loading, application and cleaning of equipment, unless the exposure to the substance was adequately precluded by the design and construction of the equipment itself or by the mounting of specific protective components on such equipment;
- workers, who needed to wear suitable protective clothing, in particular gloves, if they had to enter a treated area before the specific re-entry period had expired.

***The final regulatory action was based on a risk or hazard evaluation:*** Yes

***Summary of the final regulatory action:*** Commission Directive 2006/132/EC of 11 December 2006 amending Directive 91/414/EEC severely restricted the placing on the market and use of plant protection products containing procymidone.

The Commission Directive amended Annex I to Directive 91/414/EEC (which was replaced by Regulation (EC) No 1107/2009 concerning the placing of plant protection products on the market) to permit the use of procymidone from 1 January 2007 to 30 June 2008. It also set in place restrictions on the use of procymidone. The Directive imposed on the Member States a requirement to review all authorisations of procymidone to ensure that the restrictions set in Directive 2006/132/EC were respected as of 30 June 2007. It also required a re-evaluation of all authorised plant protection products containing procymidone by 30 June 2008.

The restrictions limited the application of procymidone to specific crops and defined maximum application rates. It also limited the period of procymidone's inclusion in Annex I to Directive 91/414/EEC to 18 months after entry into force of Directive 2006/132/EC on 1 January 2007.

It should be noted that this period has now expired. As of 30 June 2008, procymidone is no longer included in the list of authorised active substances in Annex I. Hence, procymidone is no longer allowed to be used as plant protection product in the European Union.

***The reasons for the final regulatory action were relevant to:*** Human health and environment

***Summary of known hazards and risks to human health:*** It was concluded that it could be expected that plant protection products containing procymidone would fulfil the safety requirements laid down in Article 5(1)(a) and (b) of Directive 91/414/EEC. This conclusion was however subject to compliance with the particular requirements in sections 4, 5, 6 and 7 of the review report, as well as to the implementation of the provisions of Article 4(1) and the uniform principles laid down in Annex VI of Directive 91/414/EEC, for each procymidone containing plant protection product for which Member States would grant or review the authorisation.

Therefore, Member States had to ensure that all appropriate risk mitigation measures were applied.

Member States were also requested to pay particular attention to the protection of

- consumers, the acute dietary exposure of which needed to be controlled;
- operators, who had to wear suitable protective clothing, in particular gloves, coveralls, rubber boots and face protection or safety glasses during mixing, loading, application and cleaning of equipment, unless the exposure to the substance was adequately precluded by the design and construction of the equipment itself or by the mounting of specific protective components on such equipment;
- workers, who needed to wear suitable protective clothing, in particular gloves, if they had to enter a treated area before the specific re-entry period had expired.

Member States were requested to ensure that the authorisation holders report at the latest on 31 December of each year on incidences of operator health problems. Member States could require that elements, such as sales data and a survey of use patterns, were provided so that a realistic picture of the use conditions and the possible toxicological impact of procymidone could be obtained.

***Expected effect of the final regulatory action in relation to human health:*** Reduction of risk from the use of plant protection products containing procymidone.

**Summary of known hazards and risks to the environment:** It was concluded that it could be expected that plant protection products containing procymidone would fulfil the safety requirements laid down in Article 5(1)(a) and (b) of Directive 91/414/EEC. This conclusion was however subject to compliance with the particular requirements in sections 4, 5, 6 and 7 of the review report, as well as to the implementation of the provisions of Article 4(1) and the uniform principles laid down in Annex VI of Directive 91/414/EEC, for each procymidone containing plant protection product for which Member States would grant or review the authorisation.

Therefore, Member States had to ensure that all appropriate risk mitigation measures are applied. Member States were requested to pay particular attention to the protection of:

- aquatic organisms. Where relevant, an appropriate distance had to be kept between treated areas and surface water bodies. This distance could depend on the application or not of drift reducing techniques or devices;
- birds and mammals. Conditions of authorisation needed to include risk mitigation measures, such as a judicious timing of the application and the selection of those formulations which, as a result of their physical presentation or the presence of agents that ensure an adequate avoidance, minimise the exposure of the concerned species;
- groundwater, if the active substance were to be applied in regions with vulnerable soil and/or climatic conditions. Conditions of authorisation had to include risk mitigation measures.

**Expected effect of the final regulatory action in relation to the environment:** Reduction of risk from the use of plant protection products containing procymidone.

**Date of entry into force of the final regulatory action:** 01/07/2007

The Directive entered into force on 1 January 2007. However, Member States had to apply the provisions of this Directive as of 1 July 2007.

## NORWAY

<b>Common Name(s):</b> Isopyrazam	<b>CAS number(s):</b> 881685-58-1
-----------------------------------	-----------------------------------

**Chemical Name:** 3-(difluoromethyl)-1-methyl-N-[(1RS,4SR,9RS)-1,2,3,4-tetrahydro-9-isopropyl-1,4-methanonaphthalen-5-yl]pyrazole-4-carboxamide

**Final regulatory action has been taken for the category:** Pesticide

**Final regulatory action:** The chemical is Banned

**Use or uses prohibited by the final regulatory action:** All formulations and uses.

**The final regulatory action was based on a risk or hazard evaluation:** Yes

**Summary of the final regulatory action:** Following a risk assessment, the Norwegian Food Safety Authority adopted the following resolution: Pursuant to Regulation 26 July 2004 No. 1138 on pesticides § 4 b), the application for registration of Bontima containing the active ingredient isopyrazam is rejected.

The under lying reasons were that the toxicity of Isopyrazam's metabolites have not been documented according to what is required for groundwater metabolites when the active substance is suggested as a cat 3 carcinogen.

Isopyrazam is persistent in soil and water and accumulation in soil and sediment is likely to result from repeated use under Norwegian agricultural conditions. Isopyrazam is likely to reach the surface water in concentrations that may affect aquatic organisms. Isopyrazam's main soil metabolites are mobile as well as persistent and are likely to reach the groundwater.

**The reasons for the final regulatory action were relevant to:** Human health

**Summary of known hazards and risks to human health:** Isopyrazam's main metabolites

CSCD459488 and CSCD465008 are expected to reach the groundwater and their toxicological relevance should therefore be determined. If the metabolites are considered to be relevant according to EU criteria (carcinogenic potential cannot be excluded) then the substance should not be placed on the market. If the active substance is classified as carcinogen category 3, then the carcinogenic potential of the metabolites must also be tested. It is the opinion of the Norwegian Food Safety Authority that isopyrazam fulfills the criteria for classification as a cat 3 carcinogen since isopyrazam has been shown to give adenomas in the liver and uterus in rats. This is also supported by EFSA's conclusion on the substance.

The available documentation suggests that the metabolite CSCD459488 gives effects in the liver. However, the available documentation is limited and is not sufficient to conclude that the carcinogenic potential cannot be excluded.

**Expected effect of the final regulatory action in relation to human health:** Reducing the risk to human health from the substance isopyrazam.

**Date of entry into force of the final regulatory action:** 17/12/2013

## PARAGUAY

<b>Common Name(s):</b> Endosulfan	<b>CAS number(s):</b> 115-29-7
-----------------------------------	--------------------------------

**Chemical Name:** 6,9-Methano-2,4,3-benzodioxathiepin, 6,7,8,9,10,10-hexachloro-1,5,5a,6,9,9a-hexahydro-, 3-oxide

**Final regulatory action has been taken for the category:** Pesticide

**Final regulatory action:** The chemical is severely restricted

**Use or uses prohibited by the final regulatory action:** Banned in horticulture and fruit crops and in aerial applications

**Use or uses that remain allowed:** Allowed on extensive crops, soybeans and grain cereals

**The final regulatory action was based on a risk or hazard evaluation:** No

### **Summary of the final regulatory action:**

ESTABLISH, that SENAVE will authorize specific cases for the acquisition of analytical standards, only for laboratory use purposes.

SUSPEND, granting new registrations, issuing Prior Authorization for Import (APIM) and import in the country, and technical grade products formulated with Endosulfan in all concentrations.

DISPOSE, banning the use of Endosulfan formulations on horticulture and fruit crops, in all concentrations and formulations.

ESTABLISH, that all products with Endosulfan, active ingredient shall include into the container the label "PROHIBITED ON HORTICULTURE AND FRUIT CROPS ", been responsibility of the registrants to include this recommendation for marketing and use of the products.

DISPOSE, the gradual disposal of Endosulfan in extensive crops, within two (02) years from the entry into force of the present resolution.

ESTABLISH, the ban of aerial applications with Endosulfan formulations and shall include into the container the label "AERIAL APPLICATION PROHIBITED", been responsibility of the registrants to include this legend for marketing and use of the products.

DETERMINE that the use of formulations based on Endosulfan, will be severely restricted, and the use will be authorized only with ground application equipments in extensive crops. Products severely restricted are banned almost entirely, in order to protect the human health or the environment, and only certain specific uses remain allowed.

ALLOW, exportation, marketing and use of products formulated with Endosulfan, in all concentrations, until the completion of the period for the entry into force. To this end, registrants of

these products shall submit to SENAVE, an affidavit made by notary, regarding stocking and projection of sale and / or use of this pesticide, within 45 days from the date of entry into force of this Order.

ALLOW, importation and entry of the products if import authorizations (APIM) were issued before the entry into force of this resolution.

KEEP record of all existing products, with obligation of maintenance, with no obligation to submit the studies required as confidential information, from the entry into force of this resolution and for a period of two (02) years.

ESTABLISH, that once granted the maximum period specified on previous article, all products formulated with Endosulfan should be withdraw, disabled or destroyed, and the cost should be covered by the registrant and /or the importer.

"THUS, ISSUING OF NEW RECORDS AND IMPORTING IN THE COUNTRY OF TECHNICAL GRADE ENDOSULFAN PRODUCTS OR FORMULATIONS IN ANY CONCENTRATION, IS SUSPENDED"

***The reasons for the final regulatory action were relevant to:*** Human health and environment

***Summary of known hazards and risks to human health:*** It is characterized as extremely dangerous and there are concerns of adverse effects to human and animal health, to the flora and the environment, according to the conditions of use and handling of these products in the country, it is commonly used by farmers and has a high dose per surface unit. The lack of habit in the use of Personal Protective Equipment (PPE) increases the risk of poisoning to applicators. Also withholding periods are not usually respected by farmers, which increase the risk of poisoning in consumers.

***Expected effect of the final regulatory action in relation to human health:*** Obtain fruits and vegetables free of contaminating residues.

Reduce the risk of poisoning for operators /handlers, and the environment.

Increase protection to the environment and to the human health with focus on rural and indigenous communities.

***Summary of known hazards and risks to the environment:*** As this product is not selective, it is moderately toxic to bees, (Harmless in concentrations up to 1.5%).

Moderately toxic to birds.

Extremely toxic to fish.

***Expected effect of the final regulatory action in relation to the environment:*** It is scheduled commercialization, with present restraints, for products formulated with Endosulfan until existing stocking will last, for a period of two years.

***Date of entry into force of the final regulatory action:*** 03/11/2010

## PERU

<b><i>Common Name(s):</i></b> Aldicarb	<b><i>CAS number(s):</i></b> 116-06-3
--	---------------------------------------

***Chemical Name:*** Propanal, 2-methyl-2-(methylthio)-, O-[(methylamino)carbonyl]oxime

***Final regulatory action has been taken for the category:*** Pesticide

***Final regulatory action:*** The chemical is Banned

***Use or uses prohibited by the final regulatory action:*** All agricultural pesticides with Aldicarb active ingredient.

***Use or uses that remain allowed:*** None

**The final regulatory action was based on a risk or hazard evaluation:** Yes

**Summary of the final regulatory action:** Cancels registration and prohibits register of new agricultural chemical pesticides with Endosulfan, Aldicarb and Lead Arsenate active ingredient.

**The reasons for the final regulatory action were relevant to:** Environment

**Summary of known hazards and risks to the environment:** Considering the information on the environmental fate of Aldicarb active ingredient, it is indicated that this substance is very soluble, with high runoff (5%), low volatility, persistent in soil, moderate leaching potential to groundwater, high mobility, presents degradation metabolites in relevant soil, stable to hydrolysis and to photolysis in aquatic systems. According to the assessment of ecotoxicological data, Aldicarb is classified as extremely and highly toxic to birds, highly toxic to bees, very toxic to earthworms and highly toxic to aquatic organisms vertebrates and invertebrates, and slightly toxic to algae, therefore meets with the criteria for inclusion in Annex III of the Rotterdam Convention.

**Expected effect of the final regulatory action in relation to the environment:** Cancellation of all registers of agricultural pesticides with Aldicarb active ingredient.

**Date of entry into force of the final regulatory action:** 01/02/2012

## PERU

<b>Common Name(s):</b> Endosulfan	<b>CAS number(s):</b> 115-29-7
-----------------------------------	--------------------------------

**Chemical Name:** 6,9-Methano-2,4,3-benzodioxathiepin, 6,7,8,9,10,10-hexachloro-1,5,5a,6,9,9a-hexahydro-, 3-oxide

**Final regulatory action has been taken for the category:** Pesticide

**Final regulatory action:** The chemical is Banned

**Use or uses prohibited by the final regulatory action:** All agricultural pesticides with Endosulfan active ingredient.

**Use or uses that remain allowed:** None

**The final regulatory action was based on a risk or hazard evaluation:** Yes

**Summary of the final regulatory action:** Cancels registration and prohibits register of new agricultural chemical pesticides with Endosulfan, Aldicarb and Lead Arsenate active ingredient.

**The reasons for the final regulatory action were relevant to:** Environment

**Summary of known hazards and risks to the environment:** Considering the information on the environmental fate of endosulfan active ingredient, it is indicated that this substance is poorly soluble in water, is transported over long distances, bioaccumulates, volatile, no potential for leaching to groundwaters, persistent in soil and water, undergoes to hydrolysis and photolysis. The main degradation routes are the microbial (oxidation), hydrolysis and photolysis. The main degradation metabolites in the environment are: Endosulfan sulfate, Endosulfan dial, Endosulfan lactone, Endosulfan ether, Endosulfan hydroxy-ether, Endosulfan carboxylic acid. Endosulfan sulfate is the major degradation product, it has the same toxicity of the parent compound but it is even more persistent. In many cases we use the term "Endosulfan sum" or " $\Sigma$  Endosulfan" including the two isomers, alpha and beta, and the major degradation product, Endosulfan sulfate. According to the assessment of ecotoxicological data, Endosulfan is classified as highly toxic to birds, slightly toxic to bees, very toxic to earthworms, extremely toxic to aquatic organisms vertebrates and invertebrates, and highly toxic to algae, therefore meets with the criteria for inclusion in the list of Persistent Organic

Pollutants (POPs) and in Annex III of the Rotterdam Convention. Also note that Endosulfan is not included, to date, in the list of restricted or prohibited substances by SENASA in Peru, ([http://www.senasa.gob.pe/0/modulos/JER/JER\\_Interna.aspx?ARE=0&PFL=3&JER=193](http://www.senasa.gob.pe/0/modulos/JER/JER_Interna.aspx?ARE=0&PFL=3&JER=193)). The Ministry of Environment (MINAM) and the Technical Group for Substances (GTSQ) called for a ban in the country. The manufacturer and registrant of Endosulfan a.i. in Peru, BAYER SA, decided to withdraw all registered pesticides with Endosulfan a.i. from the national market.

**Expected effect of the final regulatory action in relation to the environment:** Cancellation of all registers of agricultural pesticides with Endosulfan active ingredient.

**Date of entry into force of the final regulatory action:** 01/02/2012

## TRINIDAD AND TOBAGO

<b>Common Name(s):</b> Aldicarb	<b>CAS number(s):</b> 116-06-3
---------------------------------	--------------------------------

**Chemical Name:** Propanal, 2-methyl-2-(methylthio)-, O-[(methylamino)carbonyl]oxime

**Final regulatory action has been taken for the category:** Pesticide

**Final regulatory action:** The chemical is Banned

**Use or uses prohibited by the final regulatory action:** All formulations and uses are prohibited.

**Use or uses that remain allowed:** None.

**The final regulatory action was based on a risk or hazard evaluation:** No

**Summary of the final regulatory action:** The Pesticides and Toxic Chemicals Control Board of Trinidad and Tobago, in fulfilling its obligation under the Rotterdam convention, hereby notifies that all formulations containing aldicarb is banned for importation, use and export in and out of Trinidad and Tobago. This is as a result of international research which shows that Aldicarb is highly hazardous to human health and the environment.

**The reasons for the final regulatory action were relevant to:** Human health

**Summary of known hazards and risks to human health:** There existed the potential for farm workers to be exposed to this pesticide as a result of the lack of adequate Personal Protective Equipment as well as the poor layout of the farm as was observed when the risk analysis was conducted. Also the lack of a structured approach to the application of the pesticide was not present, thereby presenting the potential for consumers to be exposed upon the purchase of cut flowers.

**Expected effect of the final regulatory action in relation to human health:** No exposure to farmers, workers and consumers.

**Date of entry into force of the final regulatory action:** 01/01/2009

**Synopsis of Notifications of Final Regulatory Action Received Since the Last PIC Circular**

**PART B**

**INFORMATION ON NOTIFICATIONS OF FINAL REGULATORY ACTION THAT HAVE  
BEEN VERIFIED TO NOT CONTAIN ALL THE INFORMATION REQUIREMENTS OF BY  
ANNEX I OF THE CONVENTION**

Notifications of final regulatory action that have been verified to not contain all the information requirements of Annex I of the Convention, received between 1 November 2012 and 30 April 2013.

<b>Chemical name</b>	<b>CAS No.</b>	<b>Category</b>	<b>Country</b>	<b>Region</b>
Alachlor	15972-60-8	Pesticide	Trinidad and Tobago	Latin American and the Caribbean
Endosulfan	115-29-7	Pesticide	Trinidad and Tobago	Latin American and the Caribbean
Endosulfan	115-29-7	Pesticide	Venezuela	Latin American and the Caribbean

**Synopsis of Notifications of Final Regulatory Action Received Since the Last PIC Circular**

**PART C**

**NOTIFICATIONS OF FINAL REGULATORY ACTION STILL UNDER VERIFICATION**

No notifications of final regulatory action have been received by the Secretariat for which the verification process has not yet been completed.

## **APPENDIX II**

### **PROPOSALS FOR INCLUSION OF SEVERELY HAZARDOUS PESTICIDE FORMULATIONS IN THE PIC PROCEDURE**

#### **PART A**

#### **SUMMARY OF EACH PROPOSAL FOR INCLUSION OF A SEVERELY HAZARDOUS PESTICIDE FORMULATION THAT HAS BEEN VERIFIED TO CONTAIN ALL INFORMATION REQUESTED BY ANNEX IV, PART 1, OF THE CONVENTION**

No proposals for inclusion of severely hazardous pesticide formulations in the PIC procedure, in line with Article 6, paragraph 2, have been received by the Secretariat.

**PART B****PROPOSALS FOR INCLUSION OF SEVERELY HAZARDOUS PESTICIDE  
FORMULATIONS STILL UNDER VERIFICATION**

No proposals for inclusion of severely hazardous pesticide formulations in the PIC procedure are currently under verification by the Secretariat.

## APPENDIX III

## CHEMICALS LISTED IN ANNEX III OF THE CONVENTION

Chemical	Relevant CAS number(s)	Category	Date of first dispatch of decision guidance document
2,4,5-T and its salts and esters	93-76-5*	Pesticide	Prior to adoption of Convention
Alachlor	15972-60-8	Pesticide	24 October 2011
Aldicarb	116-06-3	Pesticide	24 October 2011
Aldrin	309-00-2	Pesticide	Prior to adoption of Convention
Azinphos-methyl	86-50-0	Pesticide	To be issued 10 August 2013
Binapacryl	485-31-4	Pesticide	1 February 2005
Captafol	2425-06-1	Pesticide	Prior to adoption of Convention
Chlordane	57-74-9	Pesticide	Prior to adoption of Convention
Chlordimeform	6164-98-3	Pesticide	Prior to adoption of Convention
Chlorobenzilate	510-15-6	Pesticide	Prior to adoption of Convention
DDT	50-29-3	Pesticide	Prior to adoption of Convention
Dieldrin	60-57-1	Pesticide	Prior to adoption of Convention
Dinitro- <i>ortho</i> -cresol (DNOC) and its salts (such as ammonium salt, potassium salt and sodium salt)	534-52-1 2980-64-5 5787-96-2 2312-76-7	Pesticide	1 February 2005
Dinoseb and its salts and esters	88-85-7*	Pesticide	Prior to adoption of Convention
1,2-dibromoethane (EDB)	106-93-4	Pesticide	Prior to adoption of Convention
Endosulfan	115-29-7	Pesticide	24 October 2011
Ethylene dichloride	107-06-2	Pesticide	1 February 2005
Ethylene oxide	75-21-8	Pesticide	1 February 2005
Fluoroacetamide	640-19-7	Pesticide	Prior to adoption of Convention
HCH (mixed isomers)	608-73-1	Pesticide	Prior to adoption of Convention
Heptachlor	76-44-8	Pesticide	Prior to adoption of Convention
Hexachlorobenzene	118-74-1	Pesticide	Prior to adoption of Convention
Lindane (gamma-HCH)	58-89-9	Pesticide	Prior to adoption of Convention
Mercury compounds, including inorganic mercury compounds, alkyl mercury compounds and alkyloxyalkyl and aryl mercury compounds		Pesticide	Prior to adoption of Convention
Monocrotophos	6923-22-4	Pesticide	1 February 2005

Chemical	Relevant CAS number(s)	Category	Date of first dispatch of decision guidance document
Parathion	56-38-2	Pesticide	1 February 2005
Pentachlorophenol and its salts and esters	87-86-5*	Pesticide	Prior to adoption of Convention
Toxaphene	8001-35-2	Pesticide	1 February 2005
All tributyltin compounds including: – Tributyltin oxide – Tributyltin fluoride – Tributyltin methacrylate – Tributyltin benzoate – Tributyltin chloride – Tributyltin linoleate – Tributyltin naphthenate	56-35-9 1983-10-4 2155-70-6 4342-36-3 1461-22-9 24124-25-2 85409-17-2	Pesticide	1 February 2009
Dustable powder formulations containing a combination of: – Benomyl at or above 7%, – Carbofuran at or above 10%, – Thiram at or above 15%	17804-35-2 1563-66-2 137-26-8	Severely hazardous pesticide formulation	1 February 2005
Methamidophos (Soluble liquid formulations of the substance that exceed 600 g active ingredient/l)	10265-92-6	Severely hazardous pesticide formulation	Prior to adoption of Convention
Phosphamidon (Soluble liquid formulations of the substance that exceed 1000 g active ingredient/l)	13171-21-6 (mixture, (E)&(Z) isomers) 23783-98-4 ((Z)-isomer) 297-99-4 ((E)-isomer)	Severely hazardous pesticide formulation	Prior to adoption of Convention
Methyl-parathion (Emulsifiable concentrates (EC) at or above 19.5% active ingredient and dusts at or above 1.5% active ingredient)	298-00-0	Severely hazardous pesticide formulation	Prior to adoption of Convention
Actinolite asbestos	77536-66-4	Industrial	1 February 2005
Anthophyllite asbestos	77536-67-5 17068-78-9	Industrial	1 February 2005
Amosite asbestos	12172-73-5	Industrial	1 February 2005
Crocidolite asbestos	12001-28-4	Industrial	Prior to adoption of Convention
Tremolite asbestos	77536-68-6	Industrial	1 February 2005
Commercial octabromodiphenyl ether including: – Hexabromodiphenyl ether – Heptabromodiphenyl ether	36483-60-0 68928-80-3	Industrial	To be issued 10 August 2013
Commercial pentabromodiphenyl ether including: – Tetrabromodiphenyl ether – Pentabromodiphenyl ether	40088-47-9 32534-81-9	Industrial	To be issued 10 August 2013

Chemical	Relevant CAS number(s)	Category	Date of first dispatch of decision guidance document
Perfluorooctane sulfonic acid, perfluorooctane sulfonates, perfluorooctane sulfonamides and perfluorooctane sulfonyls including: - Perfluorooctane sulfonic acid - Potassium perfluorooctane sulfonate - Lithium perfluorooctane sulfonate - Ammonium perfluorooctane sulfonate - Diethanolammonium perfluorooctane sulfonate - Tetraethylammonium perfluorooctane sulfonate - Didecyldimethylammonium perfluorooctane sulfonate - N-Ethylperfluorooctane sulfonamide - N-Methylperfluorooctane sulfonamide - N-Ethyl-N-(2-hydroxyethyl) perfluorooctane sulfonamide - N-(2-Hydroxyethyl)-N-methylperfluorooctane sulfonamide - Perfluorooctane sulfonyl fluoride	1763-23-1 2795-39-3 29457-72-5 29081-56-9 70225-14-8 56773-42-3 251099-16-8  4151-50-2 31506-32-8 1691-99-2 24448-09-7 307-35-7	Industrial	To be issued 10 August 2013
Polybrominated biphenyls (PBB)	36355-01-8 (hexa-) 27858-07-7 (octa-) 13654-09-6 (deca-)	Industrial	Prior to adoption of Convention
Polychlorinated biphenyls (PCB)	1336-36-3	Industrial	Prior to adoption of Convention
Polychlorinated terphenyls (PCT)	61788-33-8	Industrial	Prior to adoption of Convention
Tetraethyl lead	78-00-2	Industrial	1 February 2005
Tetramethyl lead	75-74-1	Industrial	1 February 2005
Tris (2,3-dibromopropyl) phosphate	126-72-7	Industrial	Prior to adoption of Convention

\* Only the CAS numbers of parent compounds are listed. For a list of other relevant CAS numbers, reference may be made to the relevant Decision Guidance Document.

**APPENDIX IV****LISTING OF ALL IMPORT RESPONSES RECEIVED FROM PARTIES AND CASES OF FAILURE TO SUBMIT RESPONSES**

The information in this Appendix has been arranged according to the sequence of the individual chemicals as they are listed in Annex III of the Convention (and reproduced in Appendix III of the PIC Circular).

For each chemical there are three tabular summaries:

**Part 1** is an overview of new import responses received since the last PIC Circular (between 1 November 2012 to 30 April 2013) and which are published for the first time in the current PIC Circular. Detailed information concerning the responses can be found in the list of all import responses received from Parties contained in Part 2 of this Appendix.

**Part 2** is a compilation of all the import responses received from Parties by the Secretariat as of 30 April 2013. The listed responses relate to the category or categories specified for each chemical in Annex III of the Convention. The date on which the import response was first published in the PIC Circular is also indicated.

**Part 3** is a list of those Parties which have failed to provide a response regarding future import of a chemical within 9 months of the date of dispatch of the Decision Guidance Document. It also includes the date on which the Secretariat first informed all Parties, through publication in the PIC Circular, of cases of failure to transmit a response.

**APPENDIX IV - PART 1**

**OVERVIEW OF NEW IMPORT RESPONSES RECEIVED SINCE THE LAST PIC CIRCULAR**

**Pesticides**

**2,4,5-T and its salts and esters**

Albania

<b>European Union</b>	<b>Final decision on import</b>	<b>Published: 12/2003</b>	<b>no consent</b>
<b>Member States:</b> <i>Austria, Belgium, Bulgaria, Cyprus, Czech Republic, Denmark, Estonia, Finland, France, Germany, Greece, Hungary, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta**, Netherlands, Poland, Portugal, Romania, Slovakia, Slovenia, Spain, Sweden, United Kingdom of Great Britain and Northern Ireland</i>	<b>Revised: 10/2008</b>		
	<b>Remarks:</b> 2,4,5-T is classified under Council Directive 67/548/EEC of 27 June 1967 on the approximation of laws, regulations and administrative provisions relating to the classification, packaging and labelling of dangerous substances (OJ L 196, 16.8.1967, p. 1) as: Xn; R22 (Harmful; Harmful if swallowed) - Xi; R 36/37/38 (Irritant; Irritating to eyes, respiratory system and skin) - N; R50-53 (Dangerous to the environment; Very Toxic to aquatic organisms, may cause long-term adverse effects in the aquatic environment).		
	<b>Legislative or administrative measures:</b> It is prohibited to use or place on the market all plant protection products containing 2,4,5-T. The chemical was excluded from Annex I to Council Directive 91/414/EEC concerning the placing of plant protection products on the market and authorisations for plant protection products thus had to be withdrawn by 25 July 2003 (Commission Regulation 2076/2002 of 20 November 2002 (OJ L 319, 23.11.2002, p.3) extending the time period referred to in Article 8(2) of Council Directive 91/414/EEC and concerning the non-inclusion of certain active substances in Annex I to that Directive and the withdrawal of authorisations for plant protection products containing these substances).		
	**: These countries are currently PARTICIPATING STATES to the Rotterdam Convention. They are however listed here since they are Member States of the European Community (EC), which is a Party and whose import responses, in accordance with EC legislation, cover all its Member States

## Part 2 - Listing of all importing responses received from Parties

### Alachlor

CAS: 15972-60-8

<b>Albania</b>	<b>Final decision on import</b>  <b>Legislative or administrative measures:</b> Law no. 9362 dated 24/03/2005 on "Plant Protection Service", as amended. Decision of the Council of Ministers no. 1555, dated 12.11.2008 "On approval of rules of registration and assessment criteria of Plant Protection Products (PPP)." According to paragraph 7.2, Chapter II, PPP may be registered for trade and use in the Republic of Albania, if its active substance(s) is/are included in Appendix II, attached to this decision. In this Annex, alachlor is not included.	<b>Published: 06/2013</b>	<b>no consent</b>
<b>Antigua and Barbuda</b>	<b>Final decision on import</b>  <b>Legislative or administrative measures:</b> Final decision is based primarily on the fact that alachlor is a highly hazardous pesticide based on the WHO classification. It poses an unacceptably high risk to human health and the environment. The pesticides and Toxic Chemicals Control Board is committed to registering only lowest risk pesticides for use in the country unless viable alternatives are unavailable. Viable alternatives are available for this product.	<b>Published: 12/2012</b>	<b>no consent</b>
<b>Australia</b>	<b>Interim decision on import</b>	<b>Published: 12/2012</b>	<b>response did not address importation</b>
<b>Bosnia and Herzegovina</b>	<b>Final decision on import</b>  <b>Legislative or administrative measures:</b> Chemical is not included in List of active substances allowed for use in plant protection products in Bosnia and Herzegovina (Official Gazette of BiH No 03/12)	<b>Published: 06/2012</b>	<b>no consent</b>
<b>Brazil</b>	<b>Final decision on import</b>  <b>Conditions for Import:</b> According to the Law 7802/89, Decree 4074/2002, no pesticide shall be manufactured, imported, exported, traded or used unless it has been registered in Brazil. The active ingredient Alaclor is registered for agricultural purpose in crops of cotton, groundnuts, coffee, sugar cane, sunflower, corn and soybeans. <b>Legislative or administrative measures:</b> Law no. 7802/89, Decree 4074/2002 and other complementary acts of the registrant agencies.	<b>Published: 12/2012</b>	<b>consent under conditions</b>
<b>Canada</b>	<b>Final decision on import</b>  <b>Legislative or administrative measures:</b> Alachlor is banned in Canada since 1985. Therefore, it is not registered under the Pest Control Products Act.	<b>Published: 06/2012</b>	<b>no consent</b>
<b>Chile</b>	<b>Final decision on import</b>  <b>Conditions for Import:</b> On exceptional basis, the use of analytical patterns will be allowed to determine the analytes corresponding to the pure active substance and the metabolites used in a monitoring program, in studies of residues in different matrix related with forestry, agriculture and cattle, or in scientific investigation, depending on the national standards.  <b>Remarks:</b> On an exceptional basis, the use of analytical patterns will be allowed to determine the analytes corresponding to the pure active substance and the metabolites used in a monitoring program, in studies of residues in different matrix related with forestry, agriculture and cattle, or in scientific investigation, depending on the national standards.  <b>Legislative or administrative measures:</b> Agricultural and Livestock Service, Resolution No.8231, 19th December 2011.	<b>Published: 06/2012</b>	<b>consent under conditions</b>
<b>Colombia</b>	<b>Final decision on import</b>  <b>Conditions for Import:</b> In line with the information from the Technical Department of Agricultural Inputs Safety of ICA, the Alachlor holds sales record No.1346 of 25th June 1991, and No.434 of January 2001. Authorised uses are as herbicide to control weeds (arvensis) in: soybean, sorghum, cotton, peanuts, sesame, maize and cassava. <b>Remarks:</b> Decree No. 2820 of 2010, published in the Official Journal No.	<b>Published: 06/2012</b>	<b>consent under conditions</b>

47792 of 5th August 2010, Title II, on the exigibility of Environmental Licenses, in Article 8, established that the Ministry of Environment, Housing and Territorial Development, may permanently grant or deny such environmental license for the activities (...) "11. The import and/or manufacturing of those substances, materials or products subject to controls pursuant to treaties, conventions and international protocols, of environmental nature, except in cases where these rules point out a special authorisation for such purpose. Since they are LMO's (Living Modified Organisms), for which only the procedure established in Act 740 of 2002 and its regulatory decrees or rules that modify, replace or repeal it will be applied in their evaluation and decision"

**Legislative or administrative measures:** In line with the Andean Decision of Nations No.436; Andean Standard for the Registration and Control of Chemical Pesticides for Agricultural use, published in Official Journal (Year XIV, No.347, in Lima, Peru, on 17th June 1988, on the Cartagena Agreement), and the Resolution of the Colombian Institute for Agriculture and Farming (ICA) No.03759 of 16th December 2003, to enact provisions for the Registration and Control of Chemical Pesticides for Agricultural use, pesticides must be registered to be used and marketed in the country.

**IMPORTANT NOTE:** According to information from the Technical Department of Agricultural Inputs Safety of ICA, the product holds sales Register No.1346 of 25th June 1991, and 434 of 29th January 2001, and consequently it can be imported in Colombia as herbicide to control weeds (arvensis) in: soybean, sorghum, cotton, peanuts, sesame, maize and cassava. Only the company owning the mentioned register may import the product.

## Part 2 - Listing of all importing responses received from Parties

### Aldicarb

CAS: 116-06-3

<b>Albania</b>	<b>Final decision on import</b>  <b>Legislative or administrative measures:</b> Law no. 9362 dated 24/03/2005 on "Plant Protection Service", as amended. Decision of the Council of Ministers no. 1555, dated 12.11.2008 "On approval of rules of registration and assessment criteria of Plant Protection Products (PPP)." According to paragraph 7.2, Chapter II, PPP may be registered for trade and use in the Republic of Albania, if its active substance(s) is/are included in Appendix II, attached to this decision. In this Annex, aldicarb is not included.	<b>Published: 06/2013</b>	<b>no consent</b>
<b>Antigua and Barbuda</b>	<b>Final decision on import</b>  <b>Legislative or administrative measures:</b> Final decision is based primarily on the fact that aldicarb is a highly hazardous pesticide based on the WHO classification. It poses an unacceptably high risk to human health and the environment. The pesticides and Toxic Chemicals Control Board is committed to registering only lowest risk pesticides for use in the country unless viable alternatives are unavailable. Viable alternatives are available for this product.	<b>Published: 12/2012</b>	<b>no consent</b>
<b>Australia</b>	<b>Interim decision on import</b>	<b>Published: 12/2012</b>	<b>response did not address importation</b>
<b>Bosnia and Herzegovina</b>	<b>Final decision on import</b>  <b>Legislative or administrative measures:</b> Chemical is not included in List of active substances allowed for use in plant protection products in Bosnia and Herzegovina (Official Gazette of BiH No 03/12)	<b>Published: 06/2012</b>	<b>no consent</b>
<b>Brazil</b>	<b>Final decision on import</b>  <b>Conditions for Import:</b> According to the Law 7802/89, Decree 4074/2002, no pesticide shall be manufactured, imported, exported, traded or used unless it has been registered in Brazil. The active ingredient Aldicarb is registered for agricultural purpose in crops of coffee, citrus and sugar cane, only to certified farmers and registered properties by the manufacturers companies in the following Brazilian states: São Paulo, Minas Gerais and Bahia. <b>Legislative or administrative measures:</b> Law no. 7802/89, Decree 4074/2002 and other complementary acts of the registrant agencies.	<b>Published: 12/2012</b>	<b>consent under conditions</b>
<b>Canada</b>	<b>Final decision on import</b>  <b>Legislative or administrative measures:</b> Aldicarb registrations under the Pest Control Products Act in Canada expired in 1996.	<b>Published: 06/2012</b>	<b>no consent</b>
<b>Chile</b>	<b>Final decision on import</b>  <b>Conditions for Import:</b> On exceptional basis, the use of analytical patterns will be allowed to determine the analytes corresponding to the pure active substance and the metabolites used in a monitoring program, in studies of residues in different matrix related with forestry, agriculture and cattle, or in scientific investigation, depending on the national standards. <b>Remarks:</b> On an exceptional basis, the use of analytical patterns will be allowed to determine the analytes corresponding to the pure active substance and the metabolites used in a monitoring program, in studies of residues in different matrix related with forestry, agriculture and cattle, or in scientific investigation, depending on the national standards.  <b>Legislative or administrative measures:</b> Agricultural and Livestock Service, Resolution No.8231, 19th December 2011.	<b>Published: 06/2012</b>	<b>consent under conditions</b>
<b>Colombia</b>	<b>Final decision on import</b>  <b>Conditions for Import:</b> According to information from the Technical Department of Agricultural Inputs Safety of ICA, the Aldicarb holds the sales record No. 1022 of 18th September 1996. Authorised uses as insecticide pesticide on crops of chrysanthemum, citrus, coffee, carnation, cotton, rose and	<b>Published: 06/2012</b>	<b>consent under conditions</b>

	<p>potatoes.</p> <p><b>Remarks:</b> Decree No. 2820 of 2010, published in the Official Journal No. 47792 of 5th August 2010, Title II, on the exigibility of Environmental Licenses, in Article 8, established that the Ministry of Environment, Housing and Territorial Development, may permanently grant or deny such environmental license for the activities (...) "11. The import and/or manufacturing of those substances, materials or products subject to controls pursuant to treaties, conventions and international protocols, of environmental nature, except in cases where these rules point out a special authorisation for such purpose.</p> <p><b>Legislative or administrative measures:</b> In line with the Andean Decision of Nations No.436; Andean Standard for the Registration and Control of Chemical Pesticides for Agricultural use, published in Official Journal (Year XIV, No.347, in Lima, Peru, on 17th June 1988, on the Cartagena Agreement), and the Resolution of the Colombian Institute for Agriculture and Farming (ICA) No.03759 of 16th December 2003, to enact provisions for the Registration and Control of Chemical Pesticides for Agricultural use, pesticides must be registered to be used and marketed in the country.</p> <p>IMPORTANT NOTE: According to information from the Technical Department of Agricultural Inputs Safety of ICA, the product holds sales Register No.1022 of 18th September 1996, and consequently it can be imported in Colombia as insecticide pesticide on the following crops: chrysanthemum, citrus, coffee, carnation, cotton, rose and potatoes. Only the company owning the mentioned register may import the product.</p>

## Part 2 - Listing of all importing responses received from Parties

### Dinitro-ortho-cresol (DNOC) and its salts (such as ammonium salt, potassium salt and sodium salt)

CAS: 534-52-1

<b>Albania</b>	<b>Final decision on import</b>  <b>Legislative or administrative measures:</b> Law no. 9362 dated 24/03/2005 on "Plant Protection Service", as amended. Decision of the Council of Ministers no. 1555, dated 12.11.2008 "On approval of rules of registration and assessment criteria of Plant Protection Products (PPP)." According to paragraph 7.2, Chapter II, PPP may be registered for trade and use in the Republic of Albania, if its active substance(s) is/are included in Appendix II, attached to this decision. In this Annex, dinitro-ortho-cresol (DNOC) and its salts (such as ammonium salt, potassium salt and sodium salt) are not included.	<b>Published: 06/2013</b>	<b>no consent</b>
<b>Antigua and Barbuda</b>	<b>Interim decision on import</b>  <b>Statement of active consideration:</b> Revision of present Pesticides Act	<b>Published: 06/2005</b>	<b>no consent</b>
<b>Argentina</b>	<b>Interim decision on import</b>  <b>Conditions for Import:</b> Decision N° 3489/1 958 established an obligatory register at the Registro Nacional de Terapéutica Vegetal for all products used for treatment or destruction against animals or vegetals, cultivated or useful plants to be commercialized in the country.  Resolution SAGPyA N° 350/99 establish the registration requirements for the phytosanitary products in the Argentinean Republic.  <b>Remarks:</b> Decision N°3489/1958 - Published in the Official Bulletin: 24 mars 1958 Resolution SAGPyA N° 350/99 - Published in the Official Bulletin: 8 septembre 1999  Secretariat of Agriculture, Cattle, fish and food (SAGPyA) Ministry of Economy and Production Av. Paseo Colón 982 Buenos Aires, Argentina	<b>Published: 12/2006</b>	<b>consent under conditions</b>
<b>Armenia</b>	<b>Final decision on import</b>  <b>Remarks:</b> The chemical has never been manufactured, formulated in the Republic of Armenia. It was used in the Soviet Republic of Armenia of the former USSR until 1991.  The chemical was not included in the "List of plant protection chemical and biological substances allowed for use in Republic of Armenia" approved by Governmental Decision No.608 dated 30 September 2000.  The chemical is not included in the "List of chemical and biological plant protection measures allowed for use in the Republic of Armenia", approved by the Order of the Minister of Agriculture of the Republic of Armenia No 198 dated 18 November 2003.  <b>Legislative or administrative measures:</b> The chemical is included in the "List of regulated under the Rotterdam Convention chemicals and pesticides banned in the Republic of Armenia" approved by the Governmental Decision of the Republic of Armenia (No293-N dated 17 March 2005)	<b>Published: 12/2006</b>	<b>no consent</b>
<b>Australia</b>	<b>Final decision on import</b>  <b>Conditions for Import:</b> Subject to approval, registration, exemption or permit under the <i>Agricultural and Veterinary Chemical Code Act 1994</i> , noting that there are no registered uses of DNOC. <b>Remarks:</b> Industrial use of this chemical also occurs in Australia.	<b>Published: 12/2004</b>	<b>consent under conditions</b>

	<b>Legislative or administrative measures:</b> <i>Agricultural and Veterinary Chemicals Code Act 1994.</i>		
<b>Belize</b>	<b>Final decision on import</b>	<b>Published: 12/2005</b>	<b>no consent</b>
	<b>Legislative or administrative measures:</b> Classified as a prohibited pesticide in Schedule IV of the Pesticides Control Act of 1985, Chapter 181B of the Laws of Belize, and in the Pesticides Control (replacement of Schedules) Order, 1995.		
<b>Bosnia and Herzegovina</b>	<b>Final decision on import</b>	<b>Published: 12/2010</b>	<b>no consent</b>
	<b>Legislative or administrative measures:</b> Decision on prohibiting of the registration, import and placing on the market plant protection products containing certain active substances ("Official gazette of BH" No 55/08)		
<b>Brazil</b>	<b>Final decision on import</b>	<b>Published: 12/2004</b>	<b>no consent</b>
	<b>Remarks:</b> There is no pesticide registered for any purpose. <b>Legislative or administrative measures:</b> Law No. 7.802 of 11 July 1989 and Decree No. 4.074 of 04 January 2002 - Pesticides and its compounds need to be registered by the Federal Authority prior to produce, export, import, trade or use.		
<b>Burkina Faso</b>	<b>Final decision on import</b>	<b>Published: 12/2006</b>	<b>no consent</b>
	<b>Legislative or administrative measures:</b> Results of the Sahelian Pesticides Committee (CSP) meeting.		
<b>Burundi</b>	<b>Final decision on import</b>	<b>Published: 06/2008</b>	<b>no consent</b>
	<b>Legislative or administrative measures:</b> Ministerial order N° 710/81 of 9/2/2004 bans the import, trade, distribution and use of DNOC and its salts in Burundi. The reason for its ban is its likely mutagenic potential with risks of irreversible effects ; its extremely high toxicity by inhalation, contact and ingestion, risks of proven serious eye damage. It is registered in the register of banned pesticides under N° 2004-09-P001.		
<b>Canada</b>	<b>Final decision on import</b>	<b>Published: 06/2005</b>	<b>no consent</b>
	<b>Legislative or administrative measures:</b> Unless registered under the Canadian Pest Control Products Act, pesticides may not be imported, sold or used in Canada. DNOC is not registered for pest control use in Canada.		
<b>Cape Verde</b>	<b>Final decision on import</b>	<b>Published: 12/2008</b>	<b>no consent</b>
	<b>Legislative or administrative measures:</b> The pesticide has not been registered by the Sahelian Pesticide Committee which is the regional organization in charge of pesticides registration according to national legislation, Act n° 26/97		
<b>Chile</b>	<b>Final decision on import</b>	<b>Published: 12/2004</b>	<b>no consent</b>
	<b>Legislative or administrative measures:</b> The measure is based on the lack by this chemical of an Authorisation as Agricultural Pesticide to be imported, manufactured distributed, sold and used in Chile. To obtain this authorisation (Resolution 3670), stringent national regulations establishing the necessary procedures and information to obtain such authorisation are to be met.		
<b>China</b>	<b>Final decision on import</b>	<b>Published: 12/2004</b>	<b>no consent</b>
		<b>Revised: 10/2008</b>	
	<b>Legislative or administrative measures:</b> Regulations on Pesticide Administration.

### Endosulfan

CAS: 115-29-7

<b>Albania</b>	<b>Final decision on import</b>  <b>Legislative or administrative measures:</b> Law no. 9362 dated 24/03/2005 on "Plant Protection Service", as amended. Decision of the Council of Ministers no. 1555, dated 12.11.2008 "On approval of rules of registration and assessment criteria of Plant Protection Products (PPP)." According to paragraph 7.2, Chapter II, PPP may be registered for trade and use in the Republic of Albania, if its active substance(s) is/are included in Appendix II, attached to this decision. In this Annex, endosulfan is not included.	<b>Published: 06/2013</b>	<b>no consent</b>
<b>Antigua and Barbuda</b>	<b>Final decision on import</b>  <b>Legislative or administrative measures:</b> Final decision is based primarily on the fact that endosulfan is a highly hazardous pesticide based on the WHO classification. It poses an unacceptably high risk to human health and the environment. The Pesticides and Toxic Chemicals Control Board is committed to registering only lowest risk pesticides for use in the country unless viable alternatives are unavailable. Viable alternatives are available for this product.	<b>Published: 12/2012</b>	<b>no consent</b>
<b>Australia</b>	<b>Interim decision on import</b>	<b>Published: 12/2012</b>	<b>response did not address importation</b>
<b>Bosnia and Herzegovina</b>	<b>Final decision on import</b>  <b>Legislative or administrative measures:</b> Chemical is not included in List of active substances allowed for use in plant protection products in Bosnia and Herzegovina (Official Gazette of BiH No 03/12)	<b>Published: 06/2012</b>	<b>no consent</b>
<b>Brazil</b>	<b>Final decision on import</b>  <b>Legislative or administrative measures:</b> The Resolution RDC nº 28, of August, 09, 2010 of the National Health Surveillance Agency (ANVISA) established a phased ban of the active ingredient endosulfan to be concluded in 2014, when the registration of the pesticide will be cancelled. The imports are not allowed since 31 July 2011.	<b>Published: 12/2012</b>	<b>no consent</b>
<b>Canada</b>	<b>Final decision on import</b>  <b>Remarks:</b> In 2010 Canada announced the phase out of endosulfan. The last date of registrant sale under phase out is December 31, 2014. All remaining uses of endosulfan are to be discontinued by the end of 2016. <b>Legislative or administrative measures:</b> Endosulfan is currently registered under the Pest Control Products Act in Canada.	<b>Published: 06/2012</b>	<b>consent</b>
<b>Chile</b>	<b>Final decision on import</b>  <b>Conditions for Import:</b> On exceptional basis, the use of analytical patterns will be allowed to determine the analytes corresponding to the pure active substance and the metabolites used in a monitoring program, in studies of residues in different matrix related with forestry, agriculture and cattle, or in scientific investigation, depending on the national standards. <b>Remarks:</b> On an exceptional basis, the use of analytical patterns will be allowed to determine the analytes corresponding to the pure active substance and the metabolites used in a monitoring program, in studies of residues in different matrix related with forestry, agriculture and cattle, or in scientific investigation, depending on the national standards.  <b>Legislative or administrative measures:</b> Agricultural and Livestock Service, Resolution No.8231, 19th December 2011.	<b>Published: 06/2012</b>	<b>consent under conditions</b>
<b>Colombia</b>	<b>Final decision on import</b>  <b>Remarks:</b> Decree No. 2820 of 2010, published in the Official Journal No. 47792 of 5th August 2010, Title II, on the exigibility of Environmental Licenses, in Article 8, established that the Ministry of Environment, Housing and Territorial Development, may permanently grant or deny such environmental	<b>Published: 06/2012</b>	<b>no consent</b>

license for the activities (...) "11. The import and/or manufacturing of those substances, materials or products subject to controls pursuant to treaties, conventions and international protocols, of environmental nature, except in cases where these rules point out a special authorisation for such purpose. Since they are LMO's (Living Modified Organisms), for which only the procedure established in Act 740 of 2002 and its regulatory decrees or rules that modify, replace or repeal it will be applied in their evaluation and decision". Also, in line with the Andean Decision of Nations No.436; Andean Standard for the Registration and Control of Chemical Pesticides for Agricultural use, published in Official Journal (Year XIV, No.347, in Lima, Peru, on 17th June 1988, on the Cartagena Agreement), and the Resolution of the Colombian Institute for Agriculture and Farming (ICA) No.03759 of 16th December 2003, to enact provisions for the Registration and Control of Chemical Pesticides for Agricultural use, pesticides must be registered to be used and marketed in the country.

**IMPORTANT NOTE:** According to information from the Technical Department of Agricultural Inputs Safety of ICA, the product is not registered for domestic sales in the Colombian Institute for Agriculture and Farming (ICA), and consequently it can't be imported, manufactured, formulated, distributed, marketed or used in Colombia as a chemical pesticide in agriculture.

**Legislative or administrative measures:** Health Ministry Resolution 1669, Article I, 27th May 1997, issued on May 27th 1997, prohibiting import, manufacturing, marketing and use of products formulated with mixtures of Endosulfan and other active ingredients. This ban was reinforced by the State Council Decision N° 11001-03-24-000-1999-5483-01 (5483), Section One, of March 23, 2001. During the Fifth Meeting of the Parties (COP-5) to the Stockholm Convention, on Persistent Organic Pollutants, held from 25th to 29th of April 2001 in Geneva, Switzerland, the Representatives of 127 governments, agreed to include Endosulfan, technical grade and its isomers in the Annex A of the Convention, i.e. in the list of chemicals which production and use must be eliminated. Specific exemptions to the amendment to Annex A that will enter into force in one year were also defined. Likewise, the Fifth Conference of the Parties (COP-5) to the Rotterdam Convention, on the Prior Informed Consent Procedure for Certain Hazardous Chemicals and Pesticides in International Trade, held in Geneva, Switzerland, from 20th to 24th June 2011, unanimously agreed to include Alachlor, Aldicarb and Endosulfan in the list of pesticides in Annex III of the Convention, included them in the list of chemicals subject to the PIC Procedure as well. In line with the Decisions RC-573, RC-5/4 and RC-5/5, entered into force on 24 October 2011.

<b>Costa Rica</b>	<b>Final decision on import</b>  <b>Conditions for Import:</b> The pesticide must be previously registered with the State Phytosanitary Service. <b>Legislative or administrative measures:</b> 1. Plant Protection Act No. 7664: "Article 24. - Registration of substances. No person or entity may import, export, manufacture, formulate, store, distribute, transport, repackage, rebottling, announce, handle, mix, sell or use chemicals, biological or related for agricultural use, which are not registered under this Act. <b>United Republic of Tanzania</b>	<b>Final decision on import</b> <b>Remarks:</b> Not registered.	<b>Published: 01/1998</b>	<b>no consent</b>
<b>Uruguay</b>	<b>Interim decision on import</b> <b>Remarks:</b> The only existing legislative measure which specifically refers to sodium pentachlorophenate is: Resolution of Animal Sanitary Direction (Ministry of Livestock, Agriculture and Fisheries MGAP) 2 February 1990: - Import banned of sodium pentachlorophenate, registered in this Direction with No 2661, 3936, 5053 and 4565 from 1 February 1990. - Product banned for bathing sheep, to prevent or treat parasites from 1 July 1990.  This resolution concerns only formulations and uses indicated, and can't be extended to other formulations and possible agricultural and industrial uses.  There's another MGAP resolution 23 September 1997, general for organochlorine, establishing "to revoke the register and sale authorization for organochlorine insecticides for all agricultural uses" with exception of dodecachloro and endosulfan.  Thus it is presently impossible to register products for agricultural use with pentachlorophenol and its salts.  These solutions restrict their preparations register; however, the import for any destination or use not implying registration is possible.  At present sodium pentachlorophenate preparations are imported for wood treatment, formulations are no imported at a national level. These do not have to meet any special condition before being imported.  In the past pentachlorophenol formulations have been elaborated, there's no evidence of use actually.  Uses are: leather treatment, sheep baths and wood treatment. Imports have been registered until 1998 included, in the customs register for	<b>Published: 12/2006</b>	<b>consent</b>

	corresponding pentachlorophenol and its salts in chapter 29 of common external Custom.

to health by prolonged exposure through inhalation and if swallowed; N (dangerous for the environment): R50/53 - very toxic to aquatic organisms, may cause long-term adverse effect in the aquatic environment; Xn (harmful): R21 - harmful in contact with skin; Xi (irritant): R36/38 - irritating to eyes and skin.

**Legislative or administrative measures:** It is prohibited to place on the market or use plant protection products containing tributyltin compounds, since these active substances are not included in Annex I to Directive 91/414/EEC concerning the placing of plant protection products on the market (OJ L 230, 19.08.1991, p. 1) and in accordance with Commission Regulation (EC) No 2076/2002 of 20 November 2002 extending the time period referred to in Article 8(2) of Council Directive 91/414/EEC and concerning the non-inclusion of certain active substances in Annex I to that Directive and the withdrawal of authorisations for plant protection products containing these substances (OJ L 319, 23.11.2002, p. 3).

It is prohibited to place on the market or use biocidal products containing tributyltin compounds since these active substances are not included in Annex I to Directive 98/8/EC of the European Parliament and of the Council concerning the placing of biocidal products on the market (OJ L 123, 24.04.1998, p. 1) and in accordance with Commission Regulation (EC) No 1451/2007 of 4 December 2007 on the second phase of the 10-year work programme referred to in Article 16(2) of Directive 98/8/EC of the European Parliament and of the Council concerning the placing of biocidal products on the market. (OJ L 325, 11.12.2007, p. 3).

Furthermore, it is prohibited to place on the market or use all organostannic compounds for treatment of industrial waters in accordance with point 20 of Annex XVII to Regulation (EC) No 1907/2006 of the European Parliament and of the Council of 18 December 2006 concerning the Registration, Evaluation, Authorisation and Restriction of Chemicals (REACH), establishing a European Chemicals Agency, amending Directive 1999/45/EC and repealing Council Regulation (EEC) No 793/93 and Commission Regulation (EC) No 1488/94 as well as Council Directive 76/769/EEC and Commission Directives 91/155/EEC, 93/67/EEC, 93/105/EC and 2000/21/EC. (OJ L 396, 30.12.2006, p. 1).

\*\*: These countries are currently PARTICIPATING STATES to the Rotterdam Convention. They are however listed here since they are Member States of the European Community (EC), which is a Party and whose import responses, in accordance with EC legislation, cover all its Member States

<b>Uruguay</b>	<b>Interim decision on import</b>  <b>Remarks:</b> • <b>Maritime Provision No. 103</b> Naval National Prefecture of October 6th, 2005. INTERNATIONAL CONVENTION ON THE CONTROL OF HARMFUL ANTIFOULING SYSTEMS ON SHIPS. It specifies that Uruguay is in process of ratifying the International Convention on the control of harmful Antifouling Systems on ships (AFS Convention-Anti Fouling System) of 2001, which arises from serious problems to the marine environment caused by the presence of high concentrations of organotin (organ-stannic compounds) derived from the application of antifouling paints for boats hulls preservation. On the other hand, it is considered that major providers of this type of paints in the Uruguayan market do not sell paints containing these harmful compounds since September 2002. Therefore, the use of paints with organ-stannic compounds for ship hulls preservation larger than 10 GRT (gross registered tons), which covers most of the national flag ships, is banned. The nature of this provision is temporary and revocable, but to date there's no other provision to annul it, therefore it is in full force. ## Part 2 - Listing of all importing responses received from Parties

### Methamidophos (Soluble liquid formulations of the substance that exceed 600 g active ingredient/l)

CAS: 10265-92-6

<b>Albania</b>	<b>Final decision on import</b>  <b>Legislative or administrative measures:</b> Law no. 9362 dated 24/03/2005 on "Plant Protection Service", as amended. Decision of the Council of Ministers no. 1555, dated 12.11.2008 "On approval of rules of registration and assessment criteria of Plant Protection Products (PPP)." According to paragraph 7.2, Chapter II, PPP may be registered for trade and use in the Republic of Albania, if its active substance(s) is/are included in Appendix II, attached to this decision. In this Annex, methamidophos (soluble liquid formulations of the substance that exceed 600 g active ingredient/L) is not included.	<b>Published: 06/2013</b>	<b>no consent</b>
<b>Argentina</b>	<b>Final decision on import</b>  <b>Conditions for Import:</b> The Resolution SAGyP No.: 127/98 which prohibits its use in stone fruits <b>Legislative or administrative measures:</b> Resolution SAGP and A, NO.127/98 Published on the Congressional Record, March 17, 1998. Prohibits: use of products formulated on basis of active ingredient Methamidophos, in stone fruits in the Republic of Argentina	<b>Published: 12/2002</b>	<b>consent under conditions</b>
<b>Armenia</b>	<b>Interim decision on import</b>	<b>Published: 06/2001</b>	<b>no consent</b>
<b>Australia</b>	<b>Interim decision on import</b>  <b>Conditions for Import:</b> Subject to approval, registration, exemption or permit under the <i>Agricultural and Veterinary Chemical Code Act 1994</i> . <b>Statement of active consideration:</b> Reconsideration of the approvals and registrations of methamidophos: 2 years	<b>Published: 12/2004</b>	<b>consent under conditions</b>
<b>Belize</b>	<b>Final decision on import</b>  <b>Legislative or administrative measures:</b> One methamidophos formulation approved/registered in Belize and included in the Official Register of Pesticides DOES NOT exceed 600 g of the active ingredient.	<b>Published: 12/2005</b>	<b>no consent</b>
<b>Bosnia and Herzegovina</b>	<b>Final decision on import</b>  <b>Legislative or administrative measures:</b> Chemical is not included in the List of active substances allowed for use in Plant Protection Products in Bosnia and Herzegovina ("Official Gazette of BiH" No 11/11)	<b>Published: 12/2011</b>	<b>no consent</b>
<b>Brazil</b>	<b>Final decision on import</b>  <b>Conditions for Import:</b> The specified conditions are: Import allowed only for pesticide use, as a technical product (active ingredient) as well as formulations based on the active ingredient, registered after evaluation of agronomical efficacy, human toxicology and ecotoxicology by the Agricultural, Health and Environmental sectors respectively.  <b>Remarks:</b> There is no formulation registered containing more than 600 g/l active ingredient. <b>Legislative or administrative measures:</b> Law No. 7.802 of 11 July 1989 and Decree No. 4.074 of 04 January 2002 - Pesticides and its compounds need to be registered by the Federal Authority prior to produce, export, import, trade or use.	<b>Published: 12/2004</b>	<b>consent under conditions</b>
<b>Burkina Faso</b>	<b>Final decision on import</b>  <b>Legislative or administrative measures:</b> Results of the Sahelian Pesticides Committee (CSP) meeting.	<b>Published: 12/2006</b>	<b>no consent</b>

<b>Burundi</b>	<b>Final decision on import</b>  <b>Legislative or administrative measures:</b> Methamidophos is banned under Ministerial Decree N° 710/81 of 9 February 2004 because of its high toxicity, its bioaccumulation and its persistence in the environment. It is listed in the register of banned pesticides under N° 2004-01-P001.	<b>Published: 12/2004</b>	<b>no consent</b>
<b>Cameroon</b>	<b>Interim decision on import</b>  <b>Conditions for Import:</b> Only formulations containing concentrations $\leq$ 600 g/l are registered and authorized	<b>Published: 12/2008</b>	<b>consent under conditions</b>
<b>Canada</b>	<b>Final decision on import</b>  <b>Remarks:</b> Formulations containing methamidophos of >600 g/L are not registered for use under the Pest Control Products Act. Methamidophos formulation containing 480 g/L is registered as an insecticide.  <b>Legislative or administrative measures:</b> Formulations containing methamidophos of >600 g/L are not registered for use under the Pest Control Products Act.	<b>Published: 06/2012</b>	<b>no consent</b>
<b>Cape Verde</b>	<b>Final decision on import</b>  <b>Legislative or administrative measures:</b> The pesticide has not been registered by the Sahelian Pesticide Committee which is the regional organization in charge of pesticides registration according to national legislation, Act n° 26/97	<b>Published: 12/2008</b>	<b>no consent</b>
<b>Chad</b>	<b>Final decision on import</b>  <b>Remarks:</b> Not registered.	<b>Published: 01/1998</b>	<b>no consent</b>
<b>Chile</b>	<b>Final decision on import</b>  <b>Conditions for Import:</b> Subject to registration in Pesticides Registrar.	<b>Published: 07/1998</b>	<b>consent under conditions</b>
<b>China</b>	<b>Final decision on import</b>  <b>Conditions for Import:</b> Special permit documents. Import restricted to certain bodies. <b>Remarks:</b> Restricted. Not permitted for use on fruit, vegetables, herbs and tobacco. No formulations higher than 600 g/l produced.  <b>Legislative or administrative measures:</b> <ul style="list-style-type: none"> <li>Additional information related to Hong Kong Special Administrative Region (HKSAR) related to the import response for Annex III chemicals: Published: 12/06/2009; Final decision on import: No consent to import.</li> </ul>	<b>Published: 01/1998</b>  <b>Revised: 10/2008</b>	<b>consent under conditions</b>
<b>Colombia</b>	<b>Final decision on import</b>  <b>Remarks:</b> In line with the information from the Technical Department of Agricultural Inputs Safety of ICA, soluble liquid formulations of Methamidophos with the following Sales Records: 584, 1034, 1451, 2041, 2072, 2404, 3229, 3260, 3809, 4004, 4165, 4190, 4228, 4310, 3869 and 4309, are authorised only for concentrations of 400 and 800 g/l. These are the only authorised uses as insecticide-acaricide, for pests in soybean, cotton, tomato and potato. Consequently, higher concentrations than the mentioned are not authorised.  It's important to inform globally that Methamidophos soluble liquid formulations registered at ICA are in a process of re-evaluation to fulfil ICA Resolution	<b>Published: 06/2012</b>	<b>no consent</b>

	<p>No.2915 of August 2008, resulting in the re-evaluation process of chemical pesticides for agricultural use foreseen in Andean Decision 684 of 2008 of the Andean Community of Nations.</p> <p>Decree No. 2820 of 2010, published in the Official Journal No. 47792 of 5th August 2010, Title II, on the exigibility of Environmental Licenses, in Article 8, established that the Ministry of Environment, Housing and Territorial Development, may permanently grant or deny such environmental license for the activities (...) "11. The import and/or manufacturing of those substances, materials or products subject to controls pursuant to treaties, conventions and international protocols, of environmental nature, except in cases where these rules point out a special authorisation for such purpose".</p>		
<b>Costa Rica</b>	<b>Final decision on import</b>  <b>Remarks:</b> Formulations higher than 600 g/l are not registered.	<b>Published: 12/2000</b>	<b>no consent</b>
<b>Côte d'Ivoire</b>	<b>Final decision on import</b>  <b>Legislative or administrative measures:</b> It is prohibited to import, locally produce, place on the market, sell or use this product in order to protect human health and the environment. The product has not been registered since 1998.	<b>Published: 06/2004</b>	<b>no consent</b>
<b>Cuba</b>	<b>Final decision on import</b>  <b>Conditions for Import:</b> Allowed only importing of formulations below 600 g/l active ingredient as concentrates and soluble liquids  <b>Remarks:</b> Working in the gradual reduction of the imported quantities, based on the use of lower environmental and health impact alternatives  <b>Legislative or administrative measures:</b> National decision based on the process of registration of a pesticide formulation and published in the Official List of Authorized Pesticides in the Republic of Cuba	<b>Published: 12/2008</b>	<b>consent under conditions</b>
<b>Democratic People's Republic of Korea</b>	<b>Interim decision on import</b>  <b>Conditions for Import:</b> This chemical can be imported to use under the admission of the National Pesticide Registration Agency, the Ministry of Agriculture and/or the Ministry of Public Health, with assurance that the damage to users could be minimized in the condition of relevant application.	<b>Published: 12/2004</b>	<b>consent under conditions</b>
<b>Democratic Republic of the Congo</b>	<b>Final decision on import</b>  <b>Legislative or administrative measures:</b> Circular note No. 5011/0195/AGRI/PE.EL/2012 of 16 February 2012 concerning the implementation of the Rotterdam Convention, Section V, Article 19 : the use of all chemicals listed in Annex III of the Rotterdam Convention is prohibited in the DRC.	<b>Published: 06/2012</b>	<b>no consent</b>

Annex I "List of prohibited chemicals in Mongolia"

<b>Morocco</b>	<b>Final decision on import</b>  <b>Remarks:</b> Only one preparation containing metamidophos (400g/l of active principle) is temporarily authorized to be placed on the market in Morocco, with a reassessment of authorisation scheduled for May 2004 (article 3 of Act 42-95).  <b>Legislative or administrative measures:</b> The importation and the supply of the product is prohibited under Act 42-95 concerning the control and the organization of pesticide products and their use, specifying in Art 2 that importation, manufacturing, supply, sale and distribution, even free of charge, of pesticide products for agricultural purposes are prohibited if they are not authorized or, failing that, if their sale is not permitted. These authorizations will be granted only to such products the effectiveness and harmlessness of which have been established according to the requirements stated by the above mentioned Act and its Decrees of implementation (Decree no. 2-99-106 May 5th, 1999 on authorisation).	<b>Published: 06/2003</b>	<b>no consent</b>
<b>New Zealand</b>	<b>Final decision on import</b>  <b>Remarks:</b> Not registered. Only methamidophos formulations containing 600 g a.i./litre have been registered.	<b>Published: 07/1998</b>	<b>no consent</b>
<b>Nicaragua</b>	<b>Final decision on import</b>  <b>Remarks:</b> This final regulatory action is based on the final recommendations of the National Commission of Pesticides during the session of 27 April 2004 and the mandate of the Act 274 "Basic Law for the regulation and control of toxic, hazardous and other pesticides" and its regulations. The deregistration of Metamidophos entered into force on October 2008, thereafter banned the import, and set a deadline of one year to the companies having stocks for their consumption. At the meeting of Health Ministers of Central America and Dominican Republic (RESSCAD) was agreed to ban or restrict 12 pesticides causing the greatest number of poisonings, including Methamidophos, and Nicaragua was the only country in the region to cancel the registration. <b>Legislative or administrative measures:</b> Ministerial Resolution No.019-2008: registration of Methamidophos molecule is cancelled; import, commercialisation and use throughout the national territory of the pesticide is prohibited; in its raw materials, formulated products and in any other mixture. Issued by the Ministry of Agriculture and Forestry, empowered conferred under Law No.274 "Basic Law for regulation and control of pesticides, toxic and hazardous substances, and other similar", and its regulations	<b>Published: 12/2010</b>	<b>no consent</b>

### Actinolite asbestos

CAS: 77536-66-4

<b>Albania</b>	<b>Final decision on import</b>  <b>Legislative or administrative measures:</b> Law No. 9108, dated 17.07.2003 "On substances and preparations", prohibits the manufacture, import, export and distribution in the Republic of Albania for substances included in Appendix II of this Law. Actinolite asbestos fibers are part of this Appendix.	<b>Published: 06/2013</b>	<b>no consent</b>
<b>Antigua and Barbuda</b>	<b>Interim decision on import</b>  <b>Statement of active consideration:</b> Revision of the Pesticides Act which will take approximately 1 year.	<b>Published: 06/2005</b>	<b>no consent</b>
<b>Argentina</b>	<b>Final decision on import</b>  <b>Legislative or administrative measures:</b> Resolution MS, NO.845/00 Published in the Congressional Record, October 17, 2000. Prohibits: production, importation, commercialization and use of Asbestos fibres Amphiboles forms (Crocidolites, Amosite, Actinolite, Tremolite, Anthophyllite) and products formulated on its basis.	<b>Published: 12/2006</b>	<b>no consent</b>
<b>Australia</b>	<b>Final decision on import</b>  <b>Conditions for Import:</b> Import prohibited for uses that would contravene State, Territory or Commonwealth legislation. All forms of actinolite asbestos are severely restricted in Australia. Please note the following:  <p>The Australia wide ban on all new uses of asbestos and materials containing asbestos starts today (31 December 2003).</p> <p>It will be illegal under the laws of each state and territory to use, re-use or sell any products containing asbestos, including automotive brake pads and gaskets</p> <p>The same prohibition applies in the Australian government sector and it will be complemented by a Customs regulation banning imports and exports.</p> <p>The ban does not apply to asbestos products and materials that are already in place. But when they are replaced, non-asbestos alternatives must be used.</p> <p>Any stockpiles of asbestos-containing products must be safely disposed of under the applicable state and territory regulations.</p> <p>The few exemptions to the ban are restricted in scope and will operate for a limited time. They only apply where there are much greater risks to safety is asbestos is not used. Protection for exposure is still required in these cases.</p> <p>For more information, visit the latest news on NOHSC's website at <a href="http://www.nohsc.gov.au">www.nohsc.gov.au</a>.</p> <b>Legislative or administrative measures:</b> <ol style="list-style-type: none"> <li>1) <i>Work Health (Occupational Health and Safety) Regulations 2003</i> and <i>Schedule 7 - Prohibited Substances</i> - under the <i>Work Health Act 2002</i> (Northern Territory)</li> <li>2) <i>Workplace Health and Safety Regulation Amended Regulation (No. 4) 2003</i> and <i>Schedule 7 - Prohibited Substances</i> under the <i>Work Health Act 1995</i> (Queensland)</li> <li>3) <i>Occupational Health and Safety (Chrysotile Asbestos) Variation Regulations 2003</i> under the <i>Occupational Health and Safety and Welfare Act 1986</i> (South Australia)</li> <li>4) <i>Workplace Health and Safety Regulations 1988</i> under the <i>Workplace Health and Safety Act 1995</i> (Tasmania)</li> <li>5) <i>Occupational Health and Safety (Asbestos) Regulations 2003</i> under the <i>Occupational Health and Safety Act 1985</i> and the <i>Dangerous Goods Act 1985</i> (Victoria)</li> <li>6) <i>Occupational Health and Safety Regulations 1996</i> (Western Australia)</li> <li>7) <i>Health (Asbestos) Regulations 1992</i> (Western Australia)</li> <li>8) <i>Occupational Health and Safety Regulation 2001 - Sec 163</i> (New South Wales)</li> <li>9) <i>Occupational Health and Safety (Maritime Industry) (National Standards) Regulations 2003</i> under the <i>Occupational Health and Safety (Maritime Industry) Act 1993</i></li> <li>10) <i>Customs (Prohibited Imports) Regulations 1956</i></li> </ol>	<b>Published: 12/2004</b>	<b>consent under conditions</b>

<b>Guinea</b>	<b>Interim decision on import</b>  <b>Published: 12/2005</b>  <b>consent under conditions</b>  <b>Conditions for Import:</b> The conditions are as follow: <ul style="list-style-type: none"> <li>- to address a written request in order to obtain the previous authorization for import, to the responsible authority elected by the minister of the environment (reference: Articles 6 and 10 of the decision A/2001/4785/MMGE/SGG of October 26, 2001, concerning article 8 of the D/97/287/ decree PRGSGG of 24 december 1997, establishing the management and control of harmful and dangerous chemicals in Guinea Republic);</li> <li>- to obtain a previous authorization to import, delivered by competent authority (reference: Article 5 of the decision A/2001/4785/MMGE/SGG 26 october 2001)</li> <li>- asbestos actinolite only can be imported by industrial unities, mining industry, building constructions companies, electricity centrals and production and distribution centers, laboratories and research centers, etc, and this, for certain uses when the need is justify, since this product appears in order no. 57 of appendix II of the decision A/2001/4784/MMGE/SGG of October 26, 2001, making reference for application to articles 3, 4 and 5 of the D/97/287/PRG/SGG of December 24, 1997.</li> <li>- importer obligation to present the stocks of import products once arrived at the terrestrial borders, maritime or air of the national territory, for a chemical and physical control by qualified agents of the service of the environment or by any other organization of control entitled for this procedure (reference: Article 12 of the decision A/2001/4785/MMGE/SGG of October 26, 2001.</li> <li>- name, address of the competent authority from which the previous autorisation should be obtained: M. le directeur national, Direction nationale de la prevention et de la lutte contre les pollutions et nuisances, Ministere de l'Environnement, BP 3118, Conakry, Republique de Guinee. Fax: (224) 46 85 46</li> </ul> <b>Remarks:</b> Differents forms of asbestos are used in Guinea among which the actinolita asbestos could exist and, particularly, in the industrial units, mining societies, real estate constructions, power stations and networks of production and electricity, distribution, laboratories and research centers, etc. Although this product is dangerous for the health and the environment, for economic reasons it would be used at the moment in the sectors of activities sus cites. Some existence of asbestos remainders that can contain asbestos physically exists or has been hidden in some electrical power stations and mining societies, thus it is a potential danger for the workers of these sectors of activities, the workers of the informal sector and even the populations that are exposed to these dangerous and bad known products and all the implications of risks and dangers for their health, their families and to the environment. Before this situation, and awaiting the final decision concernign the actinolita asbestos, the Government, with the purpose of reducing the field of use of this dangerous product and reducing the exhibition of the populations, workers and workers of the different sectors of activities, decided to classify this product in the national list of severely restricted chemicals (Annexed II of the A/2001/4784/decision MMGE/SGG of 26 October 2001.  <b>Statement of active consideration:</b> Any actinolita asbestos import can be done without previous autorisation of the environment service and the competent authority properly approved by the environment minister (ref Articles 1 and 5 of decision A/2001/4785/MMGE/26 SGG october 2001. The approximate period until the adoption of a final decision is not defined.

### Amosite asbestos

CAS: 12172-73-5

<b>Albania</b>	<b>Final decision on import</b>  <b>Legislative or administrative measures:</b> Law No. 9108, dated 17.07.2003 "On substances and preparations", prohibits the manufacture, import, export and distribution in the Republic of Albania for substances included in Appendix II of this Law, Amosite asbestos fibers are part of this Appendix.	<b>Published: 06/2013</b>	<b>no consent</b>
<b>Antigua and Barbuda</b>	<b>Interim decision on import</b>  <b>Statement of active consideration:</b> Revision of the present Pesticides Act, taking approximately 1 year.	<b>Published: 06/2005</b>	<b>no consent</b>
<b>Argentina</b>	<b>Final decision on import</b>  <b>Legislative or administrative measures:</b> Resolution MS, NO.845/00 Published in the Congressional Record, October 17, 2000. Prohibits: production, importation, commercialization and use of Asbestos fibres Amphiboles forms (Crocidolites, Amosite, Actinolite, Tremolite, Anthophyllite) and products formulated on its basis.	<b>Published: 12/2006</b>	<b>no consent</b>
<b>Australia</b>	<b>Final decision on import</b>  <b>Conditions for Import:</b> Import prohibited for uses that would contravene State, Territory or Commonwealth legislation. All forms of amphibole asbestos are severely restricted in Australia. Please note the following:  The Australia wide ban on all new uses of asbestos and materials containing asbestos starts today (31 December 2003). It will be illegal under the laws of each state and territory to use, re-use or sell any products containing asbestos, including automotive brake pads and gaskets The same prohibition applies in the Australian government sector and it will be complemented by a Customs regulation banning imports and exports. The ban does not apply to asbestos products and materials that are already in place. But when they are replaced, non-asbestos alternatives must be used. Any stockpiles of asbestos-containing products must be safely disposed of under the applicable state and territory regulations. The few exemptions to the ban are restricted in scope and will operate for a limited time. They only apply where there are much greater risks to safety is asbestos is not used. Protection for exposure is still required in these cases. <b>Argentina</b>	<b>Final decision on import</b>  <b>Legislative or administrative measures:</b> Resolution MS, NO.845/00 Published in the Congressional Record, October 17, 2000. Prohibits: production, importation, commercialization and use of Asbestos fibres Amphiboles forms (Crocidolites, Amosite, Actinolite, Tremolite, Anthophyllite) and products formulated on its basis.	<b>Published: 12/2006</b>	<b>no consent</b>
<b>Australia</b>	<b>Final decision on import</b>  <b>Conditions for Import:</b> Import prohibited for uses that would contravene State, Territory or Commonwealth legislation. All forms of amphibole asbestos are severely restricted in Australia. Please note the following:  The Australia wide ban on all new uses of asbestos and materials containing asbestos starts today (31 December 2003). It will be illegal under the laws of each state and territory to use, re-use or sell any products containing asbestos, including automotive brake pads and gaskets The same prohibition applies in the Australian government sector and it will be complemented by a Customs regulation banning imports and exports. The ban does not apply to asbestos products and materials that are already in place. But when they are replaced, non-asbestos alternatives must be used. Any stockpiles of asbestos-containing products must be safely disposed of under the applicable state and territory regulations. The few exemptions to the ban are restricted in scope and will operate for a limited time. They only apply where there are much greater risks to safety is asbestos is not used. Protection for exposure is still required in these cases. For more information, visit the latest news on NOHSC's website at <a href="http://www.nohsc.gov.au">www.nohsc.gov.au</a> .  <b>Legislative or administrative measures:</b> 1) <i>Work Health (Occupational Health and Safety) Regulations 2003</i> and <i>Schedule 7 - Prohibited Substances - under the Work Health Act 2002</i> (Northern Territory) 2) <i>Workplace Health and Safety Regulation Amended Regulation (No. 4) 2003 and Schedule 7 - Prohibited Substances under the Work Health Act 1995</i> (Queensland) 3) <i>Occupational Health and Safety (Chrysotile Asbestos) Variation Regulations 2003</i> under the <i>Occupational Health and Safety and Welfare Act 1986</i> (South Australia) 4) <i>Workplace Health and Safety Regulations 1988</i> under the <i>Workplace Health and Safety Act 1995</i> (Tasmania) 5) <i>Occupational Health and Safety (Asbestos) Regulations 2003</i> under the <i>Occupational Health and Safety Act 1985</i> and the <i>Dangerous Goods Act 1985</i> (Victoria) 6) <i>Occupational Health and Safety Regulations 1996</i> (Western Australia) 7) <i>Health (Asbestos) Regulations 1992</i> (Western Australia) 8) <i>Occupational Health and Safety Regulation 2001 - Sec 163</i> (New South Wales)	<b>Published: 12/2004</b>	<b>consent under conditions</b>

<b>Member States:</b> <i>Austria, Belgium, Bulgaria, Cyprus, Czech Republic, Denmark, Estonia, Finland, France, Germany, Greece, Hungary, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta**, Netherlands, Poland, Portugal, Romania, Slovakia, Slovenia, Spain, Sweden, United Kingdom of Great Britain and Northern Ireland</i>	<b>Legislative or administrative measures:</b> It is prohibited to place on the market and use all forms of asbestos fibres and products containing them. The chemicals were banned by a series of regulatory actions dating from 1983, the latest of which is Commission Directive 1999/77/EC (Official Journal of the European Communities (OJ) L207 of 6 August 1999, p18) adapting to technical progress for the sixth time Annex I to Council Directive 76/769/EEC relating to the approximation of the laws, regulations and administrative provisions of the Member States relating to restrictions on the marketing and use of certain dangerous substances and preparations.  <b>**:</b> These countries are currently PARTICIPATING STATES to the Rotterdam Convention. They are however listed here since they are Member States of the European Community (EC), which is a Party and whose import responses, in accordance with EC legislation, cover all its Member States	<b>Revised: 10/2008</b>	
<b>Ghana</b>	<b>Interim decision on import</b>	<b>Published: 12/2004</b>	<b>consent under conditions</b>
<b>Conditions for Import:</b> The importer should obtain import permit from the Environmental Protection Agency of Ghana containing information including but not limited to: Quantity of chemical to be imported; Source of chemical (Exporting country) End use(s) of the chemical within Ghana  <b>Statement of active consideration:</b> A survey needs to be conducted to determine if the chemical is currently being used in Ghana or if it would be required in the country in the future and for what purpose. The time required before a final decision can be reached is approximately one year.			
<b>Guinea</b>	<b>Interim decision on import</b>	<b>Published: 12/2005</b>	<b>consent under conditions</b>
<b>Conditions for Import:</b> The conditions are as follow: -to address a written request in order to obtain the previous authorization for import, to the responsible authority elected by the minister of the environment (reference: Articles 6 and 10 of the decision A/2001/4785/MMGE/SGG of October 26, 2001, concerning article 8 of the D/97/287/ decree PRGSGG of 24 december 1997, establishing the management and control of harmful and dangerous chemicals in Guinee Republic); - to obtain a previous authorization to import, delivered by competent authority (reference: Article 5 of the decision A/2001/4785/MMGE/SGG 26 october 2001) - asbestos anthophyllite only can be imported by industrials unities, mining industry, building constructions companies, electricity centrals and production and distribution centers, laboratories and research centers, etc, and this, for certain uses when the need is justify, since this product appears in order no. 57 of appendix II of the decision A/2001/4784/MMGE/SGG of October 26, 2001, making reference for application to articles 3, 4 and 5 of the D/97/287/PRG/SGG of December 24, 1997. - importer obligation to present the stocks of import products once arrived at the terrestrial borders, maritime or air of the national territory, for a chemical and physical control by qualified agents of the service of the environment or by any other organization of control entitled for this procedure (reference: Article 12 of the decision A/2001/4785/MMGE/SGG of October 26, 2001. - name, address of the competent authority from which the previous autorisation should be obtained: M. le directeur national, Direction nationale de la prevention et de la lutte contre les pollutions et nuisances, Ministere de l'Environnement, BP 3118, Conakry, Republique de Guinee. Fax (224) 46 85 46  <b>Remarks:</b> Differents forms of asbestos are used in Guinea among which the anthophyllite asbestos could exist and, particularly, in the industrial units, mining societies, real estate constructions, power stations and networks of production and electricity, distribution, laboratories and research centers, etc. Although this product is dangerous for the health and the environment, for economic reasons it would be used at the moment in the sectors of activities sus cites. Some existence of asbestos remainders that can contain asbestos physically exists or has been hidden in some electrical power stations and mining societies, thus it is a potential danger for the workers of these sectors of activities, the workers of the informal sector and even the populations that are exposed to these dangerous and bad known products and all the implications of			

risks and dangers for their health, their families and to the environment. Before this situation, and awaiting the final decision concernign the actinolita asbestos, the Government, with the purpose of reducing the field of use of this dangerous product and reducing the exhibition of the populations, workers and workers of the different sectors of activities, decided to classify this product in the national list of severely restricted chemicals (Annexed II of the A/2001/4784/decision MMGE/SGG of 26 October 2001.

**Statement of active consideration:** Any anthophyllite asbestos import can be done without previous autorisation of the environment service and the competent authority properly approved by the environment minister (ref Articles 1 and 5 of decision A/2001/4785/MMGE/26 SGG october 2001. The approximate period until the adoption of a final decision is not defined.

<b>Canada</b>	<b>Final decision on import</b>  <b>Conditions for Import:</b> An asbestos consumer product that contains crocidolite asbestos may be imported if it is one of the following consumer products and requirements (a), (b) and (c) are met.  1 Asbestos cement pipes 2 Torque converters 3 Diaphragms for chloralkali production 4 Acid and temperature resistant seals, gaskets, gland packings and flexible	<b>Published: 06/2012</b>	<b>consent under conditions</b>

- couplings
- 5 A product that is composed of or contains one or more of the asbestos products set out in items 1 to 4
- A consumer product is defined as a product, including its components, parts or accessories, that may reasonably be expected to be obtained by an individual to be used for non-commercial purposes, including for domestic, recreational and sports purposes, and includes its packaging.
- Requirements:
- (a) the consumer product is not composed entirely of crocidolite asbestos;
- (b) Unless the consumer product composed entirely of crocidolite asbestos is imported for the purpose of manufacturing a product set out in item 3 or 4, above. In this case, the Canadian importer will have to meet obligations of section 5 of the *Asbestos Product Regulations* <<http://laws-lois.justice.gc.ca/eng/regulations/SOR-2007-260/FullText.html>>.
- (b) a person who uses the consumer product in a reasonably foreseeable manner cannot come into contact with airborne asbestos from the consumer product; and
- (c) in the case of a consumer product set out in any of items 1 to 4 of the table to this section, the following statement is legibly printed and prominently displayed on the consumer product's container or, if the consumer product has no container, on the consumer product itself or on a label affixed to it: "CONTAINS CROCIDOLITE ASBESTOS - CONTIENT DE L'AMIANTE CROCIDOLITE". This label must be printed in bold-faced type that has the following minimum height:
- In the case of an asbestos consumer product that is in a container whose main display panel area is set out in column 2 of the table below, the height set out in column 2;
  - In the case of an asbestos consumer product that is not in a container, that is rectangular or cylindrical in shape and whose main display panel area is set out in column of the table below, the height set out in column 2;
  - In the case of an asbestos consumer product that is not in a container and that is not rectangular or cylindrical in shape, 12mm

Item	Column 1 Area of the main display panel	Column 2 Minimum height of type (mm)
1	250 cm <sup>2</sup> or less	2
2	More than 250 cm <sup>2</sup> but not more than 1 000 cm <sup>2</sup>	6
3	More than 1 000 cm <sup>2</sup> but not more than 3 500 cm <sup>2</sup>	12
4	More than 3 500 cm <sup>2</sup>	24

**Legislative or administrative measures:** The *Asbestos Products Regulations* (SOR/2007-260) (<<http://laws-lois.justice.gc.ca/eng/regulations/SOR-2007-260/FullText.html>>) under the *Canada Consumer Product Safety Act* (CCPSA) (<<http://laws-lois.justice.gc.ca/eng/acts/C-1.68/index.html>>) applies to the import, advertising and sale of consumer products that contain asbestos. The import of a consumer product containing asbestos is permitted subject to the conditions of the CCPSA and its Regulations.

<b>Guinea</b>	<b>Interim decision on import</b>	<b>Published: 12/2005</b>	<b>no consent</b>
<p><b>Conditions for Import:</b> The conditions are as follow:</p> <ul style="list-style-type: none"> <li>- to address a written request in order to obtain the previous authorization for import, to the responsible authority elected by the minister of the environment (reference: Articles 6 and 10 of the decision A/2001/4785/MMGE/SGG of October 26, 2001, concerning article 8 of the D/97/287/ decree PRGSGG of 24 december 1997, establishing the management and control of harmful and dangerous chemicals in Guinea Republic);</li> <li>- to obtain a previous authorization to import, delivered by competent authority (reference: Article 5 of the decision A/2001/4785/MMGE/SGG 26 october 2001)</li> <li>- asbestos crocidolite only can be imported by industrial units, mining industry, building constructions companies, electricity centrals and production and distribution centers, laboratories and research centers, etc, and this, for certain uses when the need is justify, since this product appears in order no. 57 of appendix II of the decision A/2001/4784/MMGE/SGG of October 26, 2001, making reference for application to articles 3, 4 and 5 of the D/97/287/PRG/SGG of December 24, 1997.</li> <li>- importer obligation to present the stocks of import products once arrived at the terrestrial borders, maritime or air of the national territory, for a chemical and physical control by qualified agents of the service of the environment or by any other organization of control entitled for this procedure (reference: Article 12 of the decision A/2001/4785/MMGE/SGG of October 26, 2001.</li> <li>- name, address of the competent authority from which the previous autorisation should be obtained:</li> </ul> <p>M. le directeur national, Direction nationale de la prevention et de la lutte contre les pollutions et nuisances, Ministere de l'Environnement, BP 3118, Conakry, Republique de Guinee. Fax (224) 46 85 46</p> <p><b>Remarks:</b> Differents forms of asbestos are used in Guinea among which the crocidolite could exist and, particularly, in the industrial units, mining societies, real estate constructions, power stations and networks of production and electricity, distribution, laboratories and research centers, etc. Although this product is dangerous for the health and the environment, for economic reasons it would be used at the moment in the sectors of activities sus cites. Some existence of asbestos remainders that can contain asbestos physically exists or has been hidden in some electrical power stations and mining societies, thus it is a potential danger for the workers of these sectors of activities, the workers of the informal sector and even the populations that are exposed to these dangerous and bad known products and all the implications of risks and dangers for their health, their families and to the environment. Before this situation, and awaiting the final decision concernign the actinolita asbestos, the Government, with the purpose of reducing the field of use of this dangerous product and reducing the exhibition of the populations, workers and workers of the different sectors of activities, decided to classify this product in the national list of severely restricted chemicals (Annexed II of the A/2001/4784/decision MMGE/SGG of 26 October 2001.</p> <p><b>Statement of active consideration:</b> Any crocidolite asbestos import can be done without previous autorisation of the environment service and the competent authority properly approved by the environment minister (ref Articles 1 and 5 of decision A/2001/4785/MMGE/26 SGG october 2001. The approximate period until the adoption of a final decision is not defined.</p>

<b>Jordan</b>	<b>Final decision on import</b> <b>Legislative or administrative measures:</b> Regulation on import N(1) of 1997 and its amendment of 1999 authorise the Ministry of Health to regulate the import of restricted and banned chemicals to Jordan. A special permission is required from the Ministry of Health for chemicals prior to their entry into the country. The regulation is under the process of modification after issuing new law for "import and export" No 21 for 2001. The institution responsible for issuing the Law and regulation for import is the Ministry of Industry and Trade. The import of chemicals is regulated by the Ministry of Health which is the focal point for chemicals in Jordan and the DNA (C) for the PIC procedure. In 1996 the Ministry of Health adopted a list of banned and restricted chemicals, after consulting the international agencies and authorities to improve control of chemicals entering the market. The list was updated in 2001. This chemical was included in the list in 1996 as a banned chemical.	<b>Published: 06/2002</b>	<b>no consent</b>

### Tremolite

CAS: 77536-68-6

<b>Albania</b>	<b>Final decision on import</b>  <b>Legislative or administrative measures:</b> Law No. 9108, dated 17.07.2003 "On substances and preparations", prohibits the manufacture, import, export and distribution in the Republic of Albania for substances included in Appendix II of this Law. Tremolite is part of this Appendix.	<b>Published: 06/2013</b>	<b>no consent</b>
<b>Antigua and Barbuda</b>	<b>Interim decision on import</b>  <b>Statement of active consideration:</b> Revision of the present Pesticides Act is required, which will take approximately 1 year.	<b>Published: 06/2005</b>	<b>no consent</b>
<b>Argentina</b>	<b>Final decision on import</b>  <b>Legislative or administrative measures:</b> Resolution MS, NO.845/00 Published in the Congressional Record, October 17, 2000. Prohibits: production, importation, commercialization and use of Asbestos fibres Amphiboles forms (Crocidolites, Amosite, Actinolite, Tremolite, Anthophyllite) and products formulated on its basis.	<b>Published: 12/2006</b>	<b>no consent</b>
<b>Australia</b>	<b>Final decision on import</b>  <b>Conditions for Import:</b> Import prohibited for uses that would contravene State, Territory or Commonwealth legislation. All forms of asbestos tremolite are severely restricted in Australia. Please note the following:  The Australia wide ban on all new uses of asbestos and materials containing asbestos starts today (31 December 2003). It will be illegal under the laws of each state and territory to use, re-use or sell any products containing asbestos, including automotive brake pads and gaskets The same prohibition applies in the Australian government sector and it will be complemented by a Customs regulation banning imports and exports. The ban does not apply to asbestos products and materials that are already in place. But when they are replaced, non-asbestos alternatives must be used. Any stockpiles of asbestos-containing products must be safely disposed of under the applicable state and territory regulations. The few exemptions to the ban are restricted in scope and will operate for a limited time. They only apply where there are much greater risks to safety is asbestos is not used. Protection for exposure is still required in these cases. Column 1	Column 2														
Non-crocidolite asbestos products	Requirements														
A textile fibre consumer product that is worn on the person	(a) The consumer product provides protection from fire or heat hazards. (b) A person who uses the consumer product in a reasonably foreseeable manner cannot come into contact with airborne asbestos from the consumer product.														
A consumer product that is used by a child in learning or play	Asbestos cannot become separated from the consumer product.														
Drywall joint cement or compound, or spackling or patching compound, that is used in construction, repair or renovation	Asbestos cannot become separated from the consumer product during its post-manufacture preparation, application or removal.														
A consumer product that is applied by spraying	(a) The asbestos is encapsulated with a binder during spraying. (b) The materials that result from the spraying are not friable after drying.														
Import of the following tremolite consumer products is prohibited:															

- (a) a consumer product for use in modeling or sculpture.
- (b) a consumer product for use in simulating ashes or embers.
- (c) a consumer product that is composed entirely of asbestos.

**Legislative or administrative measures:** The *Asbestos Products Regulations* (SOR/2007-260) (<<http://laws-lois.justice.gc.ca/eng/regulations/SOR-2007-260/FullText.html>>) under the *Canada Consumer Product Safety Act* (CCPSA) (<<http://laws-lois.justice.gc.ca/eng/acts/C-1.68/index.html>>) applies to the import, advertising and sale of consumer products that contain asbestos. The import of a consumer product containing asbestos is permitted subject to the conditions of the CCPSA and its Regulations.

<b>Guinea</b>	<b>Interim decision on import</b>	<b>Published: 12/2005</b>	<b>consent under conditions</b>
	<p><b>Conditions for Import:</b> The conditions are as follow:</p> <ul style="list-style-type: none"> <li>- to address a written request in order to obtain the previous authorization for import, to the responsible authority elected by the minister of the environment (reference: Articles 6 and 10 of the decision A/2001/4785/MMGE/SGG of October 26, 2001, concerning article 8 of the D/97/287/ decree PRGSGG of 24 december 1997, establishing the management and control of harmful and dangerous chemicals in Guinee Republic);</li> <li>- to obtain a previous authorization to import, delivered by competent authority (reference: Article 5 of the decision A/2001/4785/MMGE/SGG 26 october 2001)</li> <li>- PBB only can be imported by industrials unities, mining industry, building constructions companies, electricity centrals and production and distribution centers, laboratories and research centers, etc, and this, for certain uses when the need is justify, since this product appears in order no. 57 of appendix II of the decision A/2001/4784/MMGE/SGG of October 26, 2001, making reference for application to articles 3, 4 and 5 of the D/97/287/PRG/SGG of December 24, 1997.</li> <li>- importer obligation to present the stocks of import products once arrived at the terrestrial borders, maritime or air of the national territory, for a chemical and physical control by qualified agents of the service of the environment or by any other organization of control entitled for this procedure (reference: Article 12 of the decision A/2001/4785/MMGE/SGG of October 26, 2001.</li> <li>- name, address of the competent authority from which the previous autorisation should be obtained:</li> </ul>		

M. le directeur national, Direction nationale de la prevention et de la lutte contre les pollutions et nuisances, Ministere de l'Environnement, BP 3118, Conakry, Republique de Guinee. Fax: (224) 46 85 46

**Remarks:** Guinea has a certain number of plastic factories, of foam and painting that use diverse chemical agents like raw materials, between which the PBB could be found. This product imported and used in the industrial units under diverse commercial names, is very bad t known by the workers and the populations in general.

In quality of substitute of the PBB, there is a possibility that fractions of PBB exist in the oil remainders of PBB that are in some electrical mining and central societies of the sector. The workers of these industrial units are regularly exposed to these products and dangerous remainders with the risks and dangers that it means for their health, their families' and the environment. The Government, finding a lack of instruments for the characterization, evaluation of the toxicity, ecotoxicity, cancerigenicity, etc, of these industrial products and their remainders, with the purpose of restricting the field of use of all the forms of PBB and to reduce the exhibition of the populations, workers and of the environment, etc, decided to classify this product PIC in the national list of chemical substances strictly regulated (Annexed II of the A/2001/4784/decisionMMGE/26 SGG of October 2001, until a final decision is taken on this matter.

**Statement of active consideration:** Any PBBs import can be done without previous autorisation of the environment service and the competent authority properly approved by the environment minister (ref Articles 1 and 5 of decision A/2001/4785/MMGE/26 SGG october 2001. The approximate period until the adoption of a final decision is not defined.

Act, 1994 (ACT 490)

<b>Guinea</b>	<b>Interim decision on import</b>  <b>Conditions for Import:</b> The conditions are as follow: -to address a written request in order to obtain the previous authorization for import, to the responsible authority elected by the minister of the environment (reference: Articles 6 and 10 of the decision A/2001/4785/MMGE/SGG of October 26, 2001, concerning article 8 of the D/97/287/ decree PRGSGG of 24 december 1997, establishing the management and control of harmful and dangerous chemicals in Guinea Republic); - to obtain a previous authorization to import, delivered by competent authority (reference: Article 5 of the decision A/2001/4785/MMGE/SGG 26 october 2001) - PCBs/or PCBs equipments only can be imported by industrials unities, mining industry, building constructions companies, electricity centrals and production and distribution centers, laboratories and research centers, etc, and this, for certain uses when the need is justify, since this product appears in order no. 57 of appendix II of the decision A/2001/4784/MMGE/SGG of October 26, 2001, making reference for application to articles 3, 4 and 5 of the D/97/287/PRG/SGG of December 24, 1997. - importer obligation to present the stocks of import products once arrived at the terrestrial borders, maritime or air of the national territory, for a chemical and physical control by qualified agents of the service of the environment or by any other organization of control entitled for this procedure (reference: Article 12 of the decision A/2001/4785/MMGE/SGG of October 26, 2001. - name, address of the competent authority from which the previous autorisation should be obtained: M. le directeur national, Direction nationale de la prevention et de la lutte contre les pollutions et nuisances, Ministere de l'Environnement, BP 3118, Conakry, Republique de Guinee. Fax: (224) 46 85 46  <b>Remarks:</b> Guinea has a certain number of plastic factories, of foam and painting that use diverse chemical agents like raw materials, between which the PCB could be found. This product imported and used in the industrial units under diverse commercial names, is very bad t known by the workers and the populations in general. In quality of substitute of the PCB, there is a possibility that fractions of PCB exist in the oil remainders of PCB that are in some electrical mining and central societies of the sector. The workers of these industrial units are regularly exposed to these products and dangerous remainders with the risks and dangers that it means for their health, their families' and the environment. The Government, finding a lack of instruments for the characterization, evaluation of the toxicity, ecotoxicity, cancerigenocyt, etc, of these industrial products and their remainders, with the purpose of restricting the field of use of all the forms of PCB and to reduce the exhibition of the populations, workers and of the environment, etc, decided to classify this product PIC in the national list of chemical substances strictly regulated (Annexed II of the A/2001/4784/decisionMMGE/26 SGG of October 2001, until a final decision is taken on this matter.  <b>Statement of active consideration:</b> Any import of PCB can be done without previous autorisation of the environment service and the competent authority properly approved by the environment minister (ref Articles 1 and 5 of decision A/2001/4785/MMGE/26 SGG october 2001. The approximate period until the adoption of a final decision is not defined.	<b>Published: 12/2005</b>	<b>consent under conditions</b>

<b>Jordan</b>	<p><b>Final decision on import</b></p> <p><b>Published: 06/2002</b></p> <p><b>Legislative or administrative measures:</b> Regulation of import N(1) of 1997 and its amendment of 1999 authorise the Ministry of Health to regulate the import of restricted and banned chemical to Jordan. A special permission is required from the Ministry of Health for chemicals prior to their entry into the country. The regulation is under the process of modification after issuing new law for "import and export" No 21 for 2001. The institution responsible for issuing the Law and regulation for import is the Ministry of Industry and Trade. The import of chemical is regulated by the Ministry of Health which is the focal point for chemicals in Jordan and the DNA (C) for the PIC procedure. In 1996 the Ministry of Health adopted a list of banned and restricted chemicals, after consulting the international agencies and authorities to improve control of chemicals entering the market. The list was updated in 2001. This chemical was included in the list in 1996 as a banned chemical.</p>	<b>no consent</b>

<b>Jordan</b>	<b>Final decision on import</b> <b>Remarks:</b> Regulation of import N(1) of 1997 and its amendment of 1999 authorise the Ministry of Health to regulate the import of restricted and banned chemical to Jordan. A special permission is required from the Ministry of Health for chemicals prior to they entry into the country. The regulation is under the process of modification after issuing new law for " import and export" No 21 for 2001. The institution responsible for issuing the Law and regulation for import is the Ministry of Industry and Trade. The import of chemical is regulated by the Ministry of Health which is the focal point for chemicals in Jordan and the DNA (C) for the PIC procedure, In 1996 the Ministry of Health adopted a list of banned and restricted chemicals, after consulting the international agencies and authorities to improve control of chemicals entering the market. The list was updated in 2001. This chemical was included in the list in 1996 as a banned chemical.	<b>Published: 06/2002</b>	<b>no consent</b>

<p><b>Conditions for Import:</b> The conditions are as follow: -to address a written request in order to obtain the previous authorization for import, to the responsible authority elected by the minister of the environment (reference: Articles 6 and 10 of the decision A/2001/4785/MMGE/SGG of October 26, 2001, concerning article 8 of the D/97/287/ decree PRSGG of 24 december 1997, establishing the management and control of harmful and dangerous chemicals in Guinea Republic);</p>			

- to obtain a previous authorization to import, delivered by competent authority (reference: Article 5 of the decision A/2001/4785/MMGE/SGG 26 october 2001)

- asbestos tremolite only can be imported by industrials unities, mining industry, building constructions companies, electricity centrals and production and distribution centers, laboratories and research centers, etc, and this, for certain uses when the need is justify, since this product appears in order no. 57 of appendix II of the decision A/2001/4784/MMGE/SGG of October 26, 2001, making reference for application to articles 3, 4 and 5 of the D/97/287/PRG/SGG of December 24, 1997.

- importer obligation to present the stocks of import products once arrived at the terrestrial borders, maritime or air of the national territory, for a chemical and physical control by qualified agents of the service of the environment or by any other organization of control entitled for this procedure (reference: Article 12 of the decision A/2001/4785/MMGE/SGG of October 26, 2001.

- name, address of the competent authority from which the previous autorisation should be obtained:

M. le directeur national, Direction nationale de la prevention et de la lutte contre les pollutions et nuisances, Ministere de l'Environnement, BP 3118, Conakry, Republique de Guinee. Fax: (224) 46 85 46

**Remarks:** The lead tetraethyle (PTE) at the moment was not object of any import in its pure form. It is introduced in the country like a component of the kerosene, a frequently consumed fuel by civilian and military aviation in urban, rural, and suburbans zones and in the houses the kerosene is used for lamps of lighting system for case of storms, the fire in the kitchens. In both cases, the smoke and gases of combustion of the kerosene provoke lead emission and environment contamination on great scale by the lead.

The exhibition of the populations to the emitted lead and the contamination of the food chain by this product are dangerous for the health. However, we would need adapted means to regularly evaluate correctly and the consequences at sanitary and environmental levels of the exhibition to the lead by populations in general and specially by the most vulnerable social levels (pregnant women, young people, old people and children etc.) . Before these situations, the Government and the oil societies are promoting the import and the progressive use of the equipment with gas butane for the domestic.

**Statement of active consideration:** Any tetraethyl lead import can be done without previous autorisation of the environment service and the competent authority properly approved by the environment minister (ref Articles 1 and 5 of decision A/2001/4785/MMGE/26 SGG october 2001. The approximate period until the adoption of a final decision is not defined.

<b>New Zealand</b>	<b>Final decision on import</b> <b>Conditions for Import:</b> Currently present in imported aviation gasoline and high performance racing gasoline. Imported as a single substance for the use as a refining chemical, specifically a blending component for reference fuels. This consent restricts the importation of TEL to those uses only. <b>Remarks:</b> This final decision relates to tetraethyl lead as a single component substance and as part of a mixture except when it is part of aviation gasoline. The import of aviation gasoline containing <0.14% w/v (0.85 g Pb/l) tetraethyl lead is permitted under the HSNO Act. The import of tetraethyl lead for use as a blending component for reference fuels is also permitted under the HSNO Act. Small-scale use of this substance in a laboratory for research and development or teaching is exempt from a HSNO approval provided all the requirements of section 33 of the HSNO Act are met. <b>Legislative or administrative measures:</b> The transitional provisions for tetraethyl lead under the Hazardous Substances and New Organisms Act 1996 (HSNO) expire on 1 July 2006 when the Toxic Substances Regulations 1983 are revoked. From 1st July 2006, tetraethyl lead will be transferred into the Hazardous Substances and New Organisms Act 1996 (HSNO) as a single existing substance, in the formulation referred to in Section 1.3.  Aviation gasoline containing 0.14% w/v (<0.85 g Pb/l) Tetraethyl lead was approved under the HSNO Act on 1 April 2004. <b>Uruguay</b>	<p><b>Final decision on import</b></p> <p><b>Published: 12/2006</b></p> <p><b>consent under conditions</b></p> <p><b>Conditions for Import:</b> Concerning automobile gasolines, in Law 17,775 of 31 may/2004 is indicated:  Article 2: the commercialization is prohibited, in the national territory, from 31 December 2004, of gasolines whose total lead content, is more than 13 mg/l (thirteen milligrams per liter)  Article 3: It applies to any import of fuel with the same limit indicated in the previous article, from the entry into force of this law.</p> <p><b>Remarks:</b> The only imported product that contains lead tetraethyl is the gasoline for aviation of 100 octanes. The maximum content is 1,12 lead g/L (1,89 g of tetraethyl lead). It is imported by ANCAP, according to specifications of Norm ASTM D910.</p> <p>In 2004 the ANCAP refinery was transformed in order to be enabled to produce gasolines with lead additives, and gasolines are produced without lead and the gasoline premium 97 SP the MTBE is used as additive in one gasoline.</p>

**Legislative or administrative measures:** Law n° 17.775, Prevention of contamination by lead.

Venezuela (Bolivarian Republic of)	Interim decision on import	Published: 12/2007	consent under conditions
	<p><b>Conditions for Import:</b> The conditions expressed are: Description of the national legislative/administrative measures: Nevertheless, the permission of the Ministry of Energy and Petroleum for import of this chemical is required. In Venezuela there is currently a resolution from the Ministry of Energy and Petroleum to eliminate gasoline containing lead: GACETA OFICIAL DE LA REPUBLICA BOLIVARIANA DE VENEZUELA N° 340.979, MINISTERIO DE ENERGIA Y PETROLEO, DESPACHO DEL MINISTERIO, Caracas, 15 agosto 2006 N° 301 195° Y 146°</p> <p><b>Resolution:</b> In accordance with Article 156, paragraph 16 of the Constitution of the Bolivarian Republic of Venezuela, and Articles 8 and 60 of the organic hydrocarbons law Decree, and also in accordance with Article 76 of the organic public administration law. The constitution of the Bolivarian Republic of Venezuela states in Article 127, that the State will protect the environment, biological diversity, energy resources, and ecological processes among others. As the Organic Law of Hydrocarbons states in Article 8 that the Ministry of Energy and Mines (now Energy and Oil) is concerned with the formulation of regulations, policy and planning, realization and control of activities in the field of the hydrocarbons, which includes matters relating to the development, conservation, management and control of resources, as well as market studies, the analysis and fixing of prices for oil and its products. As Article 19 of the Organic Law of Hydrocarbons, states that all persons engaged in activities related to the law, should do so in a continuous and efficient way, in accordance with the applicable rules and best practices available scientifically and technically on Occupational Safety and Health and environmental hygiene for the development of and rational use of hydrocarbons. Since it is necessary to withdraw from the domestic market leaded gasoline in order to preserve the environment, substituting this product with other varieties of unleaded petrol (gasoline ecological), which would result in reducing the emissions of carbon monoxide and nitrogen oxides (internal combustion products).</p> <p><b>Resolves:</b> Article 1.- This resolution aims to establish the types of products to be sold in establishments authorized to carry out such activity, as well as prices to be applied to the sale to the public. Article 2.- Sets throughout the country types and maximum prices for the public sale of motor gasoline sold in establishments authorized to carry out this activity. Unleaded petrol with an octane rating of 95 and an anti-explosion index rating of 91, refers to gasoline without the component Tetraethyl Lead (TEL), corresponding to the COVENIN standards. Unleaded petrol with an octane rating of 91 and an anti-explosion index rating of 87 refers to gasoline without the tetraethyl lead component. Corresponding to the values set by COVENIN. Article 3.- The trade of the products mentioned in the previous article, will enter into force once this resolution is published. Article 4.- Duration of the implementation of this resolution shall be determined by the Directorate of Commerce and the Directorate of Supply and Audit and Inspection of this Ministry Article 5.- Violations of the provisions of this Resolution shall be punished as provided in the Organic Law of Hydrocarbons and the resolutions that apply in each case. Article 6.- Repealing resolutions No. 203 dated July 15, 1997, published in the Official Gazette No. 36248 dated July 15</p>

<b>Brazil</b>	<b>Final decision on import</b>  <b>Statement of active consideration:</b> A study of uses in the country is being undertaken, to allow import only for use permitted or after joint evaluation of human toxicology and exotoxicology by the Health and Environmental sectors respectively. A vehicle pollution control program which is underway in the country (PROCONVE), has as its main objective the pollutant emission reductions for vehicles, and technological developments both for engineering and pollution monitoring.	<b>Published: 12/2011</b>  <b>Revised: 06/2011</b>	<b>consent</b>
<b>Burkina Faso</b>	<b>Final decision on import</b>  <b>Legislative or administrative measures:</b> Law no. 041/96/08 ADP of November 1996, which establishes a pesticide control in Burkina Faso and the law n°. 006-98/26 AN of March 1998 on the modification of law 041/96/ADP of the 08/11/96.	<b>Published: 06/2006</b>	<b>no consent</b>

	Law no. 005/97/ADP of 30 January 1997, on the Environment Code in Burkina Faso		
<b>Canada</b>	<b>Final decision on import</b>  <b>Conditions for Import:</b> Conditions are established on the import of Tetramethyl lead when contained in gasoline, or for the purpose of blending with gasoline. With the exception of the uses listed below, the maximum concentration of lead in gasoline produced, imported, sold or offered for sale in Canada is 5 mg/l. Exceptions: - Gasoline for use in aircraft - Gasoline for use in competition vehicles <b>Legislative or administrative measures:</b> The <i>Gasoline Regulations</i> (SOR/90-247) and its amendments (< <a href="http://laws-lois.justice.gc.ca/eng/regulations/SOR-90-247/index.html">http://laws-lois.justice.gc.ca/eng/regulations/SOR-90-247/index.html</a> >) under the <i>Canadian Environmental Protection Act, 1999</i> (< <a href="http://laws-lois.justice.gc.ca/eng/acts/C-15.31/index.html">http://laws-lois.justice.gc.ca/eng/acts/C-15.31/index.html</a> >) limit the lead and phosphorous content in gasoline that is produced, imported or sold in Canada to 5 mg/L and 1.3 mg/L, respectively. The use of leaded gasoline was prohibited in cars in 1990 when the <i>Gasoline Regulations</i> (the Regulations) came into force under the <i>Canadian Environmental Protection Act</i> . An on-going exemption exists for leaded gasoline for use in aircraft and an indeterminate exemption for leaded gasoline for use in competition vehicles is currently in place.	<b>Published: 06/2012</b>	<b>consent under conditions</b>
<b>Chile</b>	<b>Final decision on import</b>  <b>Remarks:</b> In Chile exists a rule of Primary Quality for Lead in the Air , Supreme Decree No. 136 of 2000, which establishes a value of 05 micrograms by meter cube normal (ug/m3N) as annual concentration. From 1994 the entrance to national territory of new vehicles that do not have catalytic converter technology is prohibit , which means that at the present the lead gasoline is not sold in all the country, as this one is incompatible with the catalytic technology. In our country there are three fuel refineries that produce gasoline with specific standards for sale in the Metropolitan Region, being the rule of gas discharge of combustion for vehicles the most strict of the country, which has meant a high rate of renovation of the park to vehicular towards technology with catalytic converters, and therefore, refineries had chosen to eliminate uses of lead compounds in the gasolines that produce, replacing these antidetonating by other types, as they are the oxygenated ones.	<b>Published: 12/2005</b>	<b>consent</b>

- name, address of the competent authority from which the previous autorisation should be obtained:

M. le directeur national, Direction nationale de la prevention et de la lutte contre les pollutions et nuisances, Ministere de l'Environnement, BP 3118, Conakry, Republique de Guinee. Fax: (224) 46 85 46

**Remarks:** The lead tetramethyle (PTM) at the moment was not object of any import in its pure form. It is introduced in the country like a component of the kerosene, a frequently consumed fuel by civilian and military aviation in urban, rural, and suburbans zones and in the houses the kerosene is used for lamps of lighting system for case of storms, the fire in the kitchens. In both cases, the smoke and gases of combustion of the kerosene provoke lead emission and environment contamination on great scale by the lead.

The exhibition of the populations to the emitted lead and the contamination of the food chain by this product are dangerous for the health. However, we would need adapted means to regularly evaluate correctly and the consequences at sanitary and environmental levels of the exhibition to the lead by populations in general and specially by the most vulnerable social levels (pregnant women, young people, old people and children etc.) . Before these situations, the Government and the oil societies are promoting the import and the progressive use of the equipment with gas butane for the domestic.

**Statement of active consideration:** Any tetramethyl lead import can be done without previous autorisation of the environment service and the competent authority properly approved by the environment minister (ref Articles 1 and 5 of decision A/2001/4785/MMGE/26 SGG october 2001. The approximate period until the adoption of a final decision is not defined.

Venezuela (Bolivarian Republic of)	Interim decision on import	Published: 12/2007	consent under conditions
	<p><b>Conditions for Import:</b> The conditions expressed are: Description of the national legislative/administrative measures: Nevertheless, the permission of the Ministry of Energy and Petroleum for import of this chemical is required. In Venezuela there is currently a resolution from the Ministry of Energy and Petroleum to eliminate gasoline containing lead: GACETA OFICIAL DE LA REPUBLICA BOLIVARIANA DE VENEZUELA N° 340.979, MINISTERIO DE ENERGIA Y PETROLEO, DESPACHO DEL MINISTERIO, Caracas, 15 agosto 2006 N°301 195º Y 146º</p> <p>In accordance with Article 156, paragraph 16 of the Constitution of the Bolivarian Republic of Venezuela, and Articles 8 and 60 of the organic hydrocarbons law Decree, and also in accordance with Article 76 of the organic public administration law.</p> <p>The constitution of the Bolivarian Republic of Venezuela states in Article 127, that the State will protect the environment, biological diversity, energy resources, and ecological processes among others. As the Organic Law of Hydrocarbons states in Article 8 that the Ministry of Energy and Mines (now Energy and Oil) is concerned with the formulation of regulations, policy and planning, realization and control of activities in the field of the hydrocarbons, which includes matters relating to the development, conservation, management and control of resources, as well as market studies, the analysis and fixing of prices for oil and its products.</p> <p>As Article 19 of the Organic Law of Hydrocarbons, states that all persons engaged in activities related to the law, should do so in a continuous and efficient way, in accordance with the applicable rules and best practices available scientifically and technically on Occupational Safety and Health and environmental hygiene for the development of and rational use of hydrocarbons. Since it is necessary to withdraw from the domestic market leaded gasoline in order to preserve the environment, substituting this product with other varieties of unleaded petrol (gasoline ecological), which would result in reducing the emissions of carbon monoxide and nitrogen oxides (internal combustion products).</p> <p><b>Resolves:</b></p> <p>Article 1.- This resolution aims to establish the types of products to be sold in establishments authorized to carry out such activity, as well as prices to be applied to the sale to the public.</p> <p>Article 2.- Sets throughout the country types and maximum prices for the public sale of motor gasoline sold in establishments authorized to carry out this activity. Unleaded petrol with an octane rating of 95 and an anti-explosion index rating of 91, refers to gasoline without the component Tetraethyl Lead (TEL), corresponding to the COVENIN standards. Unleaded petrol with an octane rating of 91 and an anti-explosion index rating of 87 refers to gasoline without the tetraethyl lead component. Corresponding to the values set by COVENIN.</p> <p>Article 3.- The trade of the products mentioned in the previous article, will enter into force once this resolution is published.</p> <p>Article 4.- duration of the implementation of this resolution shall be determined by the Directorate of Commerce and the Directorate of Supply and Audit and Inspection of this Ministry</p> <p>Article 5.- violations of the provisions of this Resolution shall be punished as provided in the Organic Law of Hydrocarbons and the resolutions that apply in each case.</p> <p>Article 6.- repealing resolutions No. 203 dated July 15, 1997, published in the Official Gazette No. 36248 dated July 15</p>

<b>Gambia</b>	<b>Interim decision on import</b> <b>01/1997</b>	<b>Published:</b>	<b>no consent</b>
	<b>Remarks:</b> The DNA requests the following information on Tris: information on sources, uses and forms of Tris.		
<b>Ghana</b>	<b>Final decision on import</b> <b>12/2004</b>	<b>Published:</b>	<b>no consent</b>
	<b>Legislative or administrative measures:</b> Environmental Protection Agency Act, 1994 (ACT 490)		
<b>Guinea</b>	<b>Interim decision on import</b> <b>12/2005</b>	<b>Published:</b>	<b>consent</b> <b>under</b> <b>conditions</b>
	<p><b>Conditions for Import:</b> The conditions are as follow:</p> <ul style="list-style-type: none"> <li>-to address a written request in order to obtain the previous authorization for import, to the responsible authority elected by the minister of the environment (reference: Articles 6 and 10 of the decision A/2001/4785/MMGE/SGG of October 26, 2001, concerning article 8 of the D/97/287/ decree PRGSGG of 24 december 1997, establishing the management and control of harmful and dangerous chemicals in Guinee Republic);</li> <li>- to obtain a previous authorization to import, delivered by competent authority (reference: Article 5 of the decision A/2001/4785/MMGE/SGG 26 october 2001)</li> <li>- tris (2,3 dibromopropyl) phosphate only can be imported by industrial unities, mining industry, building constructions companies, electricity centrals and production and distribution centers, laboratories and research centers, etc, and this, for certain uses when the need is justify, since this product appears in order no. 57 of appendix II of the decision A/2001/4784/MMGE/SGG of October 26, 2001, making reference for application to articles 3, 4 and 5 of the D/97/287/PRG/SGG of December 24, 1997.</li> <li>- importer obligation to present the stocks of import products once arrived at the terrestrial borders, maritime or air of the national territory, for a chemical and physical control by qualified agents of the service of the environment or by any other organization of control entitled for this procedure (reference: Article 12 of the decision A/2001/4785/MMGE/SGG of October 26, 2001.</li> <li>- name, address of the competent authority from which the previous autorisation should be obtained:                      M. le directeur national, Direction nationale de la prevention et de la lutte contre les pollutions et nuisances, Ministere de l'Environnement, BP 3118, Conakry, Republique de Guinee. Fax: (224) 46 85 46</li> </ul> <p><b>Remarks:</b> Guinea has a certain number of plastic factories, of foam and painting that use diverse chemical agents like raw materials, between which the tris (2-3 dibromopropyl)phosphate could be found. These roa materials imported and used in the industrial units under diverse commercial names, are very bad known by the workers and the populations in general.</p> <p>In some factories of plastic and painting of the sector, there are stocks of resins remainders and crystals of reddish color whose physical characteristics are assimilated to those of tris (2-3 dibromopropyl)phosphate. The workers of these industrial units are regularly exposed to these products and dangerous remainders with the risks and dangers that it means for their health, their families' and the</p>		

environment. The Government, finding a lack of instruments for the characterization, evaluation of the toxicity, ecotoxicity, cancerigenicity, etc, of these industrial products and their remainders, with the purpose of restricting the field of use of all the forms of PCB and to reduce the exhibition of the populations, workers and of the environment, etc, decided to classify this product PIC in the national list of chemical substances strictly regulated (Annexed II of the A/2001/4784/decisionMMGE/26 SGG of October 2001, until a final decision is taken on this matter.

**Statement of active consideration:** Any import of Tris phosphate can be done without previous autorisation of the environment service and the competent authority properly approved by the environment minister (ref Articles 1 and 5 of decision A/2001/4785/MMGE/26 SGG october 2001. The approximate period until the adoption of a final decision is not defined.

<b>Guinea-Bissau</b>	<b>Final decision on import</b> <b>12/2010</b>	<b>Published:</b>	<b>no consent</b>
<b>Guyana</b>	<b>Final decision on import</b> <b>12/2007</b>  <b>Legislative or administrative measures:</b> Administrative decision of the Pesticides and Toxic Chemicals Control Board. **APPENDIX V****NOTIFICATIONS OF FINAL REGULATORY ACTION FOR CHEMICALS NOT INCLUDED IN ANNEX III**

This appendix consists of two parts:

**Part A: Tabular summary of notifications of final regulatory actions for banned or severely restricted chemicals not included in Annex III and verified to contain the information requirements of Annex I of the Convention**

The tabular summary lists each notification received during the interim PIC procedure and the current PIC procedure (September 1998 to 30 April 2013) verified as containing the information requirements of Annex I of the Convention. It also indicates in which PIC Circular the summary was published. The Rotterdam Convention website ([www.pic.int](http://www.pic.int)) has information regarding all the PIC Circulars and summaries of notifications.

Summaries of notifications submitted by Parties for the chemicals listed in Annex III of the Convention verified as containing the information requirements of Annex I of the Convention have been included in the section “Notifications of final regulatory action database” on the Rotterdam Convention website ([www.pic.int](http://www.pic.int)).

**Part B: Tabular summary of notifications of final regulatory action for banned or severely restricted chemicals not included in Annex III and verified to not contain the information requirements of Annex I of the Convention**

The tabular summary lists each notification received during the interim PIC procedure and the current PIC procedure (September 1998 to 30 April 2013) verified to not contain the information requirements of Annex I of the Convention. It also indicates in which Circular information was published. Further information can be found on the Convention website ([www.pic.int](http://www.pic.int)).

## Notifications of Final Regulatory Action for chemicals not included in Annex III

### PART A

#### TABULAR SUMMARY OF NOTIFICATIONS OF FINAL REGULATORY ACTIONS FOR BANNED OR SEVERELY RESTRICTED CHEMICALS NOT INCLUDED IN ANNEX III AND VERIFIED TO CONTAIN THE INFORMATION REQUIREMENTS OF ANNEX I OF THE CONVENTION

The Secretariat has verified that the following notifications contain the information requirements of Annex I of the Convention.

Chemical name	CAS number	Category	Country	Region	Published in PIC Circular
1,1,1,2-tetrachloroethane	630-20-6	Industrial chemical	Latvia	Europe	XX
1,1,1-Trichloroethane	71-55-6	Industrial chemical	Latvia	Europe	XX
1,1,2,2-tetrachloroethane	79-34-5	Industrial chemical	Latvia	Europe	XX
1,1,2-Trichloroethane	79-00-5	Industrial chemical	Latvia	Europe	XX
1,1-dichloroethylene	75-35-4	Industrial chemical	Latvia	Europe	XX
1,3-Dichloropropene	542-75-6	Pesticide	European Union	Europe	XXXVI
1-Perfluorooctanesulfonic acid	1763-23-1	Industrial chemical	Canada	North America	XXXII
1-Perfluorooctanesulfonic acid	1763-23-1	Industrial chemical	European Union	Europe	XXXII
1-Perfluorooctanesulfonic acid	1763-23-1	Industrial chemical	Japan	Asia	XXXII
2-nitrobenzaldehyde	552-89-6	Industrial chemical	Latvia	Europe	XX
2,4,5-TP (Silvex; Fenoprop)	93-72-1	Pesticide	Thailand	Asia	XIV
2,4,6-tri-tert-butylphenol	732-26-3	Industrial chemical	Japan	Asia	XXI
2,4-D	94-75-7	Pesticide	Norway	Europe	XIII
2-Ethyl-1,3-hexanediol	94-96-2	Pesticide	Thailand	Asia	XX
2-naphthylamine	91-59-8	Industrial chemical	Japan	Asia	XXI
2-naphthylamine	91-59-8	Industrial chemical	Latvia	Europe	XX
2-naphthylamine	91-59-8	Industrial chemical	Republic of Korea	Asia	XX
2-naphthylamine	91-59-8	Industrial chemical	Switzerland	Europe	XXIII
4-nitrobiphenyl	92-93-3	Industrial chemical	Japan	Asia	XXI
4-nitrobiphenyl	92-93-3	Industrial chemical	Latvia	Europe	XX
4-nitrobiphenyl	92-93-3	Industrial chemical	Switzerland	Europe	XXIII
Acephate	30560-19-1	Pesticide	European Union	Europe	XVIII
Allyl alcohol	107-18-6	Pesticide	Canada	North America	XXII
Aluminium phosphide	20859-73-8	Pesticide & Industrial chemical	Japan	Asia	XX
Aminopyralid	150114-71-9	Pesticide	Norway	Europe	XXXIII
Amitraz	33089-61-1	Pesticide	European Union	Europe	XXI
Amitraz	33089-61-1	Pesticide	Iran (Islamic Republic of)	Asia	XXX
Amitraz	33089-61-1	Pesticide	Syrian Arab Republic	Near East	XXXII
Amitrole	61-82-5	Pesticide	Thailand	Asia	XX
Ammonium hydrogen sulfide	12124-99-1	Industrial chemical	Latvia	Europe	XX
Ammonium polysulfide	9080-17-5	Industrial chemical	Latvia	Europe	XX
Anthracene oil	90640-80-5	Industrial chemical	Latvia	Europe	XX
Aramite	140-57-8	Pesticide	Thailand	Asia	XIV
Arsenic compounds	7440-38-2	Industrial chemical	Latvia	Europe	XX

Chemical name	CAS number	Category	Country	Region	Published in PIC Circular
Arsenic pentoxide	1303-28-2	Industrial chemical	Republic of Korea	Asia	XX
Atrazine	1912-24-9	Pesticide	European Union	Europe	XXI
Azinphos ethyl	2642-71-9	Pesticide	Thailand	Asia	XIV
Azinphos-methyl	86-50-0	Pesticide	Canada	North America	XXVIII
Azinphos-methyl	86-50-0	Pesticide	Norway	Europe	XXX
Azinphos-methyl	86-50-0	Pesticide	Thailand	Asia	XIV
Benfuracarb	82560-54-1	Pesticide	European Union	Europe	XXXV
Bentazon	25057-89-0	Pesticide	Norway	Europe	XIII
Benzene	71-43-2	Industrial chemical	Latvia	Europe	XX
Benzidine	92-87-5	Industrial chemical	Canada	North America	XXVIII
Benzidine	92-87-5	Industrial chemical	Latvia	Europe	XX
Benzidine	92-87-5	Industrial chemical	Republic of Korea	Asia	XX
Benzidine and its salts	92-87-5	Industrial chemical	India	Asia	XX
Benzidine and its salts	92-87-5	Industrial chemical	Japan	Asia	XXI
Benzidine and its salts	92-87-5	Industrial chemical	Jordan	Near East	XVIII
Benzidine and its salts	92-87-5	Industrial chemical	Switzerland	Europe	XXIII
b-Hexachlorocyclohexane	319-85-7	Industrial chemical	Japan	Asia	XXXII
b-Hexachlorocyclohexane	319-85-7	Pesticide	Japan	Asia	XXXIII
b-Hexachlorocyclohexane	319-85-7	Pesticide	Thailand	Asia	XX
Bifenthrin	82657-04-3	Pesticide	Netherlands	Europe	XIV
Biphenyl-4-ylamine	92-67-1	Industrial chemical	Japan	Asia	XXI
Biphenyl-4-ylamine	92-67-1	Industrial chemical	Latvia	Europe	XX
Biphenyl-4-ylamine	92-67-1	Industrial chemical	Republic of Korea	Asia	XX
Biphenyl-4-ylamine	92-67-1	Industrial chemical	Switzerland	Europe	XXIII
Bis(2-chloroethyl)ether	111-44-4	Industrial chemical	Republic of Korea	Asia	XX
Bis(chloromethyl)ether	542-88-1	Industrial chemical	Canada	North America	XII
Bis(chloromethyl)ether	542-88-1	Industrial chemical	Japan	Asia	XXI
Bis(chloromethyl)ether	542-88-1	Industrial chemical	Republic of Korea	Asia	XX
Bitertanol	55179-31-2	Pesticide	Norway	Europe	XXXV
Bromobenzylbromotoluene	99688-47-8	Industrial chemical	Latvia	Europe	XX
Bromobenzylbromotoluene	99688-47-8	Industrial chemical	Switzerland	Europe	XXIII
Bromochlorodifluoromethane (Halon 1211)	353-59-3	Industrial chemical	Canada	North America	XIII
Bromochloromethane	74-97-5	Industrial chemical	Thailand	Asia	XXIV
Bromoxynil octanoate	1689-99-2	Pesticide	Norway	Europe	XIV
Bromuconazole	116255-48-2	Pesticide	Norway	Europe	XIII
Butralin	33629-47-9	Pesticide	European Union	Europe	XXXIII
Cadmium	7440-43-9	Industrial chemical	Latvia	Europe	XX
Cadusafos	95465-99-9	Pesticide	European Union	Europe	XXXVI
Calcium arsenate	7778-44-1	Pesticide	Thailand	Asia	XIV
Carbaryl	63-25-2	Pesticide	European Union	Europe	XXVI
Carbaryl	63-25-2	Pesticide	Jordan	Near East	XVIII
Carbaryl	63-25-2	Pesticide	Syrian Arab Republic	Near East	XXXII
Carbofuran	1563-66-2	Pesticide	European Union	Europe	XXXV
Carbon tetrachloride	56-23-5	Pesticide & Industrial chemical	Canada	North America	XII
Carbon tetrachloride	56-23-5	Industrial chemical	Latvia	Europe	XX

Chemical name	CAS number	Category	Country	Region	Published in PIC Circular
Carbon tetrachloride	56-23-5	Industrial chemical	Republic of Korea	Asia	XX
Carbon tetrachloride	56-23-5	Pesticide & Industrial chemical	Switzerland	Europe	XXI
Carbon tetrachloride	56-23-5	Pesticide	Thailand	Asia	XX
Carbosulfan	55285-14-8	Pesticide	European Union	Europe	XXXV
CFC (Totally halogenated)		Industrial chemical	Canada	North America	XII
Group Members:					
Chloral hydrate	302-17-0	Pesticide	Netherlands	Europe	XIV
Chlordecone	143-50-0	Industrial chemical	Japan	Asia	XXXII
Chlordecone	143-50-0	Pesticide	Japan	Asia	XXXIII

**APPENDIX VI****INFORMATION EXCHANGE ON CHEMICALS RECOMMENDED BY THE CHEMICAL REVIEW COMMITTEE FOR LISTING IN ANNEX III BUT FOR WHICH THE CONFERENCE OF THE PARTIES HAS YET TO TAKE A FINAL DECISION**

Appendix VI has been developed to facilitate information exchange on chemicals that have been recommended for listing in Annex III of the Convention by the Chemical Review Committee but for which the Conference of the Parties has yet to take a final decision.

This appendix provides a reference to the information submitted by Parties to the Secretariat in line with decisions RC.3/3, RC.4/4 and RC.6/8 of the Conference of the Parties and paragraph 1 of Article 14 of the Convention.

This appendix consists of two parts:

**Part 1** provides a reference to the information that has been provided by Parties to the Secretariat on national decisions concerning the management of chrysotile asbestos and liquid formulations (emulsifiable concentrate and soluble concentrate) containing paraquat dichloride at or above 276 g/L, corresponding to paraquat ion at or above 200 g/L. The table contains a summary of the information submitted by Parties for these chemicals, including the chemical name, Party, PIC Circular when the information was first circulated and a web link to the Rotterdam Convention website where the detailed information may be downloaded.

**Part 2** is a list of decisions on the future import of chrysotile asbestos and liquid formulations (emulsifiable concentrate and soluble concentrate) containing paraquat dichloride at or above 276 g/L, corresponding to paraquat ion at or above 200 g/L that have been submitted by Parties. These import decisions are circulated for information only and do not constitute part of the legally binding PIC procedure.

On the Rotterdam Convention website, in the section “Chemicals recommended for listing,” further information on these chemicals can be found, including the notifications of final regulatory action and supporting documentation available to the Chemical Review Committee and the draft Decision Guidance Documents.

**PART 1**

**INFORMATION PROVIDED BY PARTIES ON NATIONAL DECISIONS CONCERNING THE  
MANAGEMENT OF CHRYSOTILE ASBESTOS AND LIQUID FORMULATIONS  
(EMULSIFIABLE CONCENTRATE AND SOLUBLE CONCENTRATE) CONTAINING  
PARAQUAT DICHLORIDE AT OR ABOVE 276 g/L, CORRESPONDING TO PARAQUAT ION  
AT OR ABOVE 200 g/L**

**CHRYSTILE ASBESTOS**

<b>Chrysotile asbestos (CAS number: 12001-29-5)</b>		
<b>PARTY IMPORTER</b>	<b>IMPORT DECISION</b>	<b>DATE RECEIVED</b>
<b>European Union</b>	<p><u>Consent to import only subject to specified conditions:</u> The manufacture, placing on the market and use of chrysotile asbestos fibres and of articles containing these fibres added intentionally is prohibited. However, Member States may exempt the placing on the market and use of diaphragms containing chrysotile for existing electrolysis installations until they reach the end of their service life, or until suitable asbestos-free substitutes become available, whichever is the sooner. By 1 June 2011 Member States making use of this exemption shall provide a report to the Commission. The Commission shall ask the European Chemicals agency to prepare a dossier with a view to prohibit the placing on the market and use of diaphragms containing chrysotile.</p> <p><u>Administrative measure:</u> The chemical was prohibited (with the one limited derogation referred to section 5.3 above) by Regulation (EC) No 1907/2006 of the European Parliament and of the Council of 18 December 2006 concerning the registration, evaluation, authorisation and restriction of chemicals (REACH), establishing a European Chemicals Agency, amending Directive 1999/45/EC and repealing Council Regulation (EEC) No 793/93 and Commission Regulation (EC) No 1488/94 as well as Council Directive 76/769/EEC and Commission Directives 91/155/EEC, 93/67/EEC, 93/105/EC and 2000/21/EC (Official Journal of the European Communities (OJ) L396 of 30 December 2006, p. 1) as amended by Commission Regulation (EC) No 552/2009 of 22 June 2009 amending Regulation (EC) No 1907/2006 of the European Parliament and of the Council on the Registration, Evaluation, Authorisation and Restriction of Chemicals (REACH) as regards Annex XVII (OJ L 164 of 22 June 2009, p. 7).</p>	06-10-2009

**LIQUID FORMULATIONS (EMULSIFIABLE CONCENTRATE AND  
SOLUBLE CONCENTRATE) CONTAINING PARAQUAT DICHLORIDE AT  
OR ABOVE 276 g/L, CORRESPONDING TO PARAQUAT ION AT OR  
ABOVE 200 g/L**

<b>Liquid formulations (emulsifiable concentrate and soluble concentrate) containing paraquat dichloride at or above 276 g/L, corresponding to paraquat ion at or above 200 g/L</b>		
<b>PARTY IMPORTER</b>	<b>IMPORT DECISION</b>	<b>DATE RECEIVED</b>
