Cette étude en cours, qui porte sur plus de 89 000 personnes, explore les conséquences de l'utilisation des pesticides aux États-Unis sur la santé des agriculteurs et de leurs familles ainsi que de ceux qui appliquent les pesticides vendus dans le commerce pour traiter leurs cultures. Elle contient des liens donnant accès à plus de trois douzaines de documents traitant des risques pour la santé associés à l'utilisation des pesticides, y compris les risques de cancer et de décès prématuré.</p>
